The most rapid grower—Chinese Elm. A good shade tree for quick results. Beautiful 5 to 6 ft. trees, only 50c each; 2 for 90c; 4 for \$1.60 by express. Other sizes, see pages 12 and 13.

AMI QUINARD. One of the darkest everblooming roses. 2 year No. 1 plants, 58c each; 3 for \$1.45, postpaid. Note page 1 for other varieties of roses.

"It is not a home until it is planted." With Sonderegger stock success is assured. Note the wide selection of choice hardy trees and plants in this book, particularly Sonderegger's extra well shaped Evergreens, page 14.

This little book offers you as near a complete line of hardy nursery stock as has been tested, and found generally successful under varying conditions. Make it your planting guide; save by buying direct from one of the oldest American mail-order nurseries.

TREES AND SEEDS THAT GROW

**BEATRICE  
NEBRASKA**

## finer ROSES and VINES

**E. G. HILL**  
A great, massive rose of deep velvety maroon color.

**PINK RADIANCE**  
Large, brilliant rose pink; very fragrant and hardy.

**GOLDEN RAPTURE**  
Beautiful bud and flower; a vigorous grower.

**NIGHT**  
Deep blackish crimson, shaded maroon; fragrant.

**DAME EDITH HELEN**  
Very double, well shaped, glowing pink color.

**K. A. VICTORIA**  
Most popular, snowy white, double. Very good.

**TALISMAN**  
Glowing golden yellow, stained copper-red and orange rose.

**VILLE DE PARIS**  
Pretty sunflower yellow, well shaped, long lasting.

### SILVER LACE VINE

(Polygonum Auberti). There is no other vine which would compare in rapid growth, drought resistance, hardiness, and resistance to insects or plant diseases with the Silver Lace Vine. Covers a large trellis space in one season, reaching blooming size the first year. A most showy vine when in bloom from mid-summer until frost. Roots and most of vine are hardy. Per plant, 45c; 2 for 80c, postpaid.

### LARGE-FLOWERING CLEMATIS

**CLEMATIS JACKMANI.** This wonderful flower appears in great abundance, covering the entire vine. This large-flowering Clematis can also be furnished in Red and White.

**CLEMATIS MAD. ED. ANDREE—RED.** In shape, size and good growth for trellis-covers, the same as the above. Color of flowers showy red.

**CLEMATIS HENRYI.** The White large-flowering Clematis.

**PRICE:** All 3 large-flowering Clematis, your choice, started in pots for safest planting: Each, 70c; 3 for \$1.85, postpaid.

### PURPLE WISTARIA

**WISTARIA, CHINESE PURPLE.** A vine of great beauty, producing large grape-shaped fragrant flowers. Vine perfectly hardy, free from disease and insects; will begin to bloom the third year. Strong plants, 50c each; 2 for 90c, postpaid.

**BOSTON IVY.** The vine which clings to stone and brick walls. Does best on the north and east sides of the building, gradually covering the entire wall. This is the only satisfactory plant to use on stone or brick walls without support. Each, 40c; 2 for 70c, postpaid.

**CLIMBING ROSE TRIO.** One of each of roses shown at left, selected 2-year No. 1 roses, all 3 for only 95c, postpaid.

### CLEMATIS

#### SMALL FLOWERING CLEMATIS

Picture above is the Paniculata, with white blossoms. Very hardy, sure bloomer. We have also the red-flowering variety Coccinea.

Price of Clematis Paniculata (white), and Coccinea (red), 40c each; 2 for 70c, postpaid.

**CLIMBING AMERICAN BEAUTY**  
**DOROTHY PERKINS (Pink)**  
**DOROTHY PERKINS (White)**

# Quick and Sure Results . . .

2 Year, No. 1 "AA" Roses, Sure to Bloom First Year

## Everblooming Hybrid Tea Roses

**Gruss an Teplitz** Bright cherry crimson, intensely fragrant. A strong grower, the most continuous blooming rose.

**American Beauty** Very fragrant crimson carmine shaded deep pink, quite hardy, a strong grower.

**Red Radiance** Lovely red, excellent cut-flower, fragrant. One of the hardier roses.

**Red Hoover** Of the same beautiful shape as the Pres. Hoover, and as freely flowering.

**Ami Quinard** Very deep red, fragrant, choice cut-flower.

**Picture** A wonderful new rose, pink with salmon undertones, and perfectly double.

**Joanna Hill** A beautiful color combination of gold and bronze, stands up well in wet and foggy weather. Fragrant, good grower.

**Gloriana** This new yellow rose retains a perfect color even through hot weather. Blooms well.

**Golden Rapture** The buds are of shining golden color, pleasantly perfumed. Very pretty.

**President Hoover** Beautifully colored buds and blossoms of yellow with pink and flame tints. One of the very finest.

**Mme. Joseph Perraud** High-centered, perfectly formed buds, and double blossoms, ranging from shell-pink at the edges to buff and orange in the center. An outstanding new rose.

**K. A. Victoria** The most popular pure white rose, blooms most freely.

**Extra Hardy** 3 excellent Hybrid Perpetual roses.

**General Jacqueminot** Velvety crimson, very large blossoms, very fragrant.

**Paul Neyron** Thornless, with gigantic pink, fragrant flowers, very double.

**Snow Queen** Large, snow white—very double.

ALL VARIETIES

Each 58c

10 for \$14.45

POSTPAID

Guaranteed to Reach You in First Class Condition.

**Rugosa Roses** Perfectly hardy without any protection, and growing to splendid shrub sizes. For rose hedges, groups or between other flowering shrubs, of great value.

**Hansa** Showy red, very hardy shrub.

**Austrian Copper** Single blossoms, brilliant orange, with yellow.

**Sir Thomas Lipton** Snowy white, a fine hardy shrub.

**Chinese Yellow Rose** Hugonis, the early flowering, hardy bush rose. Very pretty.

**F. J. Grootendorst** Produces a wealth of curvation shaped flowers, in bouquet-like clusters, all through the summer. Very hardy.

## Dwarf Roses . . . Baby Ramblers

**Gruss an Aachen** A dwarf rose with individual double flowers, which are fragrant, and appear practically throughout the rose season from early June until heavy frost. Of the floribunda type, the color of buds and blossoms ranging from orange-pink to soft-salmon, and gradually changing to almost white.

**Golden Salmon** Bright orange salmon, looking like a bonfire from the distance. Large clusters of blossom sprays appearing throughout summer and fall.

**Ideal, Red Baby Rambler** Very bushy, well covered with clusters of dark red flowers, excellent for border. Blooms very freely.

**Catherine Zeimet** The only double, and pure white, fragrant Baby Rambler rose, blooming through the entire summer.

# Climbing Vines

the best of the year . . .  
the prettiest in existence

**Ampelopsis Engelmani** Clings firmly to trellis work and old tree trunks. Retains an excellent foliage throughout summer and fall, and is very dense. Hardy even in the North. 2-year-old very choice plants, 25c each; 3 for 60c, postpaid.

**Boston Ivy** See opposite page.

**Bittersweet** (Celastrus Scandens). A vine with nice foliage and bearing red berries in late summer which cling to the vine until late winter. Often used in winter bouquets. It is of fairly rapid growth, and is perfectly hardy. 2-year-old nice plants, 40c each; 3 for \$1.00, postpaid.

**Halleana Honeysuckle** Hall's Evergreen Honeysuckle. A very pretty vine with beautiful foliage, and a wealth of creamy white blossoms in midsummer, which are pleasantly perfumed. In the South this vine is evergreen. With us here and in the North leaves stay green until Christmas. Grows about 12 to 15 ft. high. Nice No. 1 plants, 25c each; 3 for 65c; 10 for \$1.90, postpaid.

**Scarlet Trumpet Honeysuckle** Foliage odd shaped but attractive, and blossoms of trumpet form, scarlet red and fragrant. Very good for trellis and ground cover. Very hardy, and does well almost everywhere. Nice 2-year plants, 32c each; 3 for 85c; 10 for \$2.50, postpaid.

**Clematis** Note colored picture and varieties on opposite page. This is a very choice assortment of small flowering and large flowering Clematis.

**Silver Lace Vine** A most desirable sure blooming vine, free from insects, rapid growing, and hardy. See description on opposite page. 45c each; 2 for 80c, postpaid.

**Trumpet Vine** (Bignonia Radicans). A woody vine, very hardy and long-lived, producing the well known large orange-scarlet trumpet shaped blossoms in clusters. Can also be used for covering walls or tree stumps. Nice 2-year-old vines, 32c each; 3 for 85c, postpaid.

**Virginia Creeper** Woodbine, A native American vine, a strong, hardy, rapid grower with dark green foliage changing to showy red in autumn. 2-year-old No. 1 plants, 20c each; 3 for 50c; 10 for \$1.40; postpaid.

**Chinese Wistaria** See colored picture, and description on opposite page.

**Perennial Sweet Pea** Lathyrus. A rapid growing perennial vine, producing a wealth of flowers throughout the summer, ranging in color from light pink to dark red. A beautiful plant for ground cover, fence-planting or medium trellis height. Each, 25c; 3 for 65c; 10 for \$1.65; postpaid.

**Madeira Vine** Grows from a bulb, which is wintered like the potato, in the cellar. Rapid growing, with shiny leaves, and fragrant white blossoms, for trellis or ground cover. 5 tubers, 50c; 12 for 95c, postpaid.

**Trailing Periwinkle** Vinca Minor or Creeping Myrtle. Hardy, evergreen ground cover plant, growing to a height of 6 inches, and forming a dense growth. Very attractive. 3 plants for 50c; 10 for \$1.45, postpaid.

**Climbing Roses** All varieties, 2-year strong, healthy No. 1, each, 42c; 3 for \$1.10; 6 for \$2.00, postpaid to you.

**Climbing American Beauty** A very popular favorite, a good hardy grower, with nice double flowers of red to crimson color. This is one of the finest climbing roses.

**Paul's Scarlet Climber** The intense scarlet flowers of excellent shape, good size and double appear in great abundance. In this color there is no better rose on the market; it is healthy, and a good grower.

**Dorothy Perkins** Pink and White Double, nicely shaped roses in pretty spray arrangement. The Dorothy Perkins strain is particularly hardy, requiring just a little protection where the winters are much below zero. Furnished in either Pink or White, your choice.

**Gardenia** Yellow buds and creamy centers, the finest yellow climbing rose known to us.

**Seven Sisters** A popular favorite, due to its greater hardness as well as its great freedom of bloom. The flowers and buds vary in color from rosy-red, flesh pink to almost white; a very pretty combination.

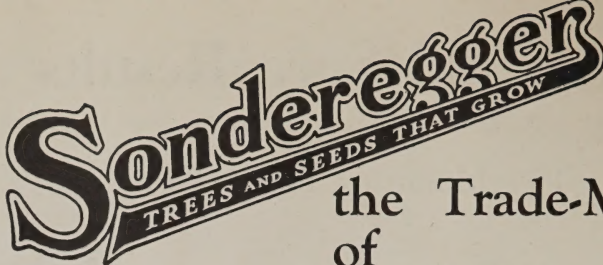

**Crimson Rambler** The hardest of all climbing roses, and a very vigorous grower. The double crimson blossoms appear in giant sprays; very attractive.

## the Trade-Mark of Hardier Trees Reasonable Prices Reliable Service

**Guarantee** All shipments are guaranteed to reach you in first class condition. Replacements are furnished free if a tree or shrub is not in satisfactory condition upon arrival, and if you notify me promptly. Stock that dies during the first growing season is replaced at one-half of the regular price. Claims, however, must reach me before October 1, 1942.

**Stock True to Name** All Sonderegger trees and plants are carefully labeled, and are true to name. However, if there should ever be an error found in the filling of an order, any tree or plant that is not true to name shall be replaced without any cost to the customer, or refund of purchase price shall be made. Claims to be sent in within 6 years from date of delivery. A stronger guarantee than most nurseries put out.

**References** Anyone who has never dealt with us before may receive reliable information concerning the Sonderegger Nurseries and Seedhouse from any of the following institutions: First National Bank, Beatrice, Nebraska; Beatrice National Bank, Beatrice, Nebraska.

**Remittances** Money orders and bank drafts are absolutely safe to mail in a letter. Personal checks from any of our friends and customers are also accepted. Cash should be sent by registered letters only; it is not safe to send cash in ordinary letters. When the remittance is not sent in with the order, and instead the amount is to be collected on delivery (C. O. D.), one-half of the total of the order should accompany the order as a down payment. C. O. D. shipments are seldom requested; it is an expensive way of making remittances, and often causes a little delay in the delivery of live trees or plants.

**Prices** This garden book and prices therein quoted cancel all former price lists or quotations. All prices quoted in this book are subject to change without notice after June 1, 1942.

**Fall Delivery** Most varieties of trees, plants and seeds can also be furnished in the fall. Prices in the fall depend entirely on general conditions, and especially on the growing season. Wherever possible I shall endeavor to furnish stock in the fall without advance in prices. The indications are, however, that all prices will be higher next fall, for fall delivery kindly ask for special quotation in September, stating number, variety and sizes of stock you wish. It would be my advice that you take advantage of the present low prices by buying and planting this spring.

**Foreign Trade** All my customers in Mexico, Panama, South America and Canada should add 14c per pound to the price of the stock for extra postage. To Canada seeds only can be shipped. On all shipments to foreign countries we pack with special care. However, arrival in good condition cannot be guaranteed.

**10% Premium on Club Orders** When several neighbors club together and send in a combined order, we send a premium to the club. The premium to be worth 10% of the order total.

**Win a Prize in Sonderegger's Photo Contest** This contest is open to every Sonderegger customer. Send in snapshots of any tree or plant that you grew from our stock. Write the age of tree or plant and how you like it. Contest closes in October, the prizes are mailed out in January.  
1st Prize.....\$5.00 2nd Prize.....\$3.00 3rd Prize.....\$2.00  
Twelve other prizes of \$1.00 each. Our contest for 1941 closed with many entries. Practically every one was awarded a prize, owing to the fact that there were many ties. Prizes are being mailed out January, 1942. At this time I wish to thank every participant in the 1941 contest. All my customers are cordially invited to join again in my 1942 contest open now, and closing in October.

**Certificate of Inspection** Our growing fields and packing departments are inspected according to the laws of this state by the Department of Agriculture at regular intervals and a copy of the certificate of inspection accompanies each and every shipment. We comply with the laws of every state, having licenses to furnish you stock no matter where you live. The only exceptions are that if there exists a Gooseberry or Currant Quarantine in your state, such plants could not be sent to you. We guarantee our stock to pass your state inspection.

**Disclaimer on Seeds** I exercise great care to keep all seeds properly labeled, clean, and pure. However, I am compelled to make all seed sales under the following disclaimer: The Sonderegger Nurseries & Seedhouse give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds they sell, and will not be responsible for the crop. Every reputable seed house is using this same disclaimer.

# Asparagus . . . Washington . . . Rustproof

2-year, strong roots, 10 for 30c; 25 for 50c; 50 for 85c; 100 for \$1.50; 500 for \$6.50; prepaid.

Exceeds in quality and heavy bearing any of the older varieties of Asparagus. Can be grown successfully most anywhere, its quality is unsurpassed for home use or for the market, and it is the one Asparagus that is rust-proof. An Asparagus bed planted properly will remain in good bearing condition for many years, and will continue to provide your table with one of the finest fresh vegetables, without re-sowing every year. Plant an Asparagus bed this year.

## How to Grow Asparagus

Manure the ground heavily, using well rotted barn manure. Make a trench 8 to 10 inches deep. Have 4 inches of good rich ground on the bottom, spread the roots out evenly and fill in about 3 to 4 inches of soil. Leave the rest of the trench lay open for the first summer. Let all stalks grow the first year. Fill the trench up in the fall of the first year. Let several stalks grow on each plant the second year. In the third year allow one stalk per plant to grow up, cut all others as soon as they appear above the ground. Cultivate occasionally. Plant 1 ft. apart in the row, the rows 3 ft. apart.

## New Paradise Asparagus . . .

This new Asparagus strain is not only the most marvelous producer ever known, it is also far superior in quality to all other types. The individual tips are exceptionally large, of finest flavor, tender, and are produced over a long period. The plant is free from Asparagus rust. For your own use in the home garden you should include the Paradise Asparagus in your planting. Healthy, strong roots, 10 for 55c; 25 for \$1.00. Prepaid to you.

# Rhubarb . . . Pie Plant

**Giant Victoria** For years this has been the outstanding Rhubarb for the home garden. Producing a heavy stalk of good quality, and bearing well in spring and fall. Does best on a moist, shady place, where it is not so apt to make seed-stalks. Heavy roots, 3 for 40c; 6 for 75c; 12 for \$1.00. Medium roots, 3 for 25c; 6 for 40c; 12 for 65c. Prepaid.

**McDonald** Another heavy producing new Rhubarb. For pies and sauce one of the very finest, and the plant is almost seedless. McDonald cooks up pink or light red, although the stalks are almost green. Its fine flavor is unsurpassed. Highly recommended for the home garden. No. 1 roots, 45c each; 3 for \$1.15; postpaid.

**Ruby Red** The only Rhubarb on the market which combines good growth, fine flavor with red color of the meat. The stalks do not run as heavy as those of McDonald or Giant Victoria, but appear in greater number. If you are looking for a true red-meated Rhubarb, this new and improved type will please you in every respect. No. 1 roots, 45c each; 3 for \$1.15; postpaid.

**Sage** The best hardy kind for seasoning. This is the true Holt's Mammoth Sage, furnishing large quantities of leaves which are dried, and used for their aromatic value. Per plant, 25c, postpaid.

**Chives** A plant of the onion family, producing very thin tops, which are cut and used for seasoning in green form, like parsley. Per bundle, 25c; 3 for 60c; postpaid.

**Boysenberry** The largest of all berries known, 60 to 80 berries fill a pint basket, while of blackberries it would take 200 berries or more. Berries 1½ to 2 inches long and 1 inch thick are not unusual. The plant is a cross between Blackberry, Raspberry and Loganberry, combining size, heavy bearing and fine taste of these fruits. Boysenberry will be a money-maker for the market gardener; it is just becoming popular; start a planting now. The plant has stood 17 degrees below zero without damage, and it came through the extreme heat and dry weather of last summer in splendid shape. It was not attacked by grasshoppers or other insects. The canes can be tied to stakes or to wires same as most other berry varieties. Good rich garden soil, or where the soil is rather light, a heavy application of well rotted barn manure will produce enormous crops. Easiest culture. Plant Boysenberries: you will like them. Nice plants, 3 for 40c; 10 for \$1.00; 25 for \$2.00; 100 for \$7.00; postpaid.

**Dwarf Blueberry** For this plant you need a low wet place, shaded, where the soil usually turns sour and few, if any, other plants would grow. Such a spot is just the right place for the Dwarf Blueberry; it increases rapidly, making a pretty dense growth of heavy producing plants about 15 inches high. I do not recommend this plant for dry land or sunny places. The berries are of good size, black with a blue bloom, very sweet; excellent for fresh dessert fruit, drying or for canning. Perfectly hardy, even in the extreme North. Plants are scarce, order early. 3 for 50c; 10 for \$1.50; 25 for \$3.00; postpaid.

fruit, for canning, for beauty, and for sure, quick results.

Mrs. G. DeLand, of Osceola, Neb., sent us this photo, and says, "this is just part of the canning I have done," and it is a splendid example of what a good home-maker can do for her family, and for the nation's good. A Sonderegger garden is "the land of plenty," for fresh

**Youngberry** This new berry has been introduced in recent years. The plant is a vigorous grower, and a heavy bearer: it is hardy in the Middle West; however, I recommend a light cover of straw over winter for best results and extra good bearing. The berries are as large as Loganberries, purplish-black; in quality they resemble raspberries. Nice plants, 3 for 30c; 10 for 80c; 25 for \$1.80; postpaid.

**American Elder** (Sambucus Canadensis) A native shrub of tall growth with stout stem, eventually growing into tree form. The small white flowers come in large flat clusters, fragrant, and appearing in spring. At that time the shrub is very showy. Later there are many large clusters of black berries which ripen in August and September. Birds are very fond of the berries, and in many instances they are used for cooking and for coloring of fruit juices. For centuries this Elder furnished its flowers, berries, even its leaves and bark for medicinal purposes, and is still regarded as a drug-yielding plant. 2 ft. shrubs, 25c each; 3 for 65c; 10 for \$1.50; postpaid.

**Peppermint** A very useful hardy herb, highly aromatic. Per plant, 25c, postpaid.

**Horse Radish** Selected cuttings for planting. The best all-white variety. 10 for 35c; 50 for \$1.50; postpaid.

**Dewberry** The variety I sell is Loretta Dewberry. It is of the blackberry type, trails on the ground. The new growth is left on the ground for the first winter, where it can be covered conveniently with straw or leaves. The following spring, after cutting off all old canes, the new growth of previous year is tied up to the wire trellis or stake for bearing. The berries are larger than regular blackberries, and the plant bears extra well. Nice plants, 3 for 25c; 10 for 60c; 25 for \$1.25; 100 for \$4.00; postpaid.

## Juneberry or Service Berry

A good substitute for the large Swamp Huckleberry or Whortleberry, which it resembles in appearance and quality. Fruit comes in clusters, reddish-purple in color, changing to bluish-black when fully ripe. Flavor a mild, rich sub-acid; excellent as a dessert fruit or canned. It is extremely hardy, not thorny, grows bushy to a height of 7 or 8 ft. Would make a nice ornamental shrub also, and is often used for that purpose, as it is very showy when in full bloom. Juneberry makes no fiber-roots; it is not a fast grower, but lasts for many years. I would call Juneberry a desirable combination flowering and fruit plant. 30c each; 3 for 75c; 10 for \$2.20; postpaid.

**Buffalo Berry** Shepherdia. Red berries about the size of currants literally covering twigs and branches. Make excellent preserves and jelly. Bush absolutely hardy; would also make a desirable ornamental shrub. I am offering this shrub at the request of many of my customers. 30c each; 3 for 75c; 10 for \$2.10; prepaid.

**Sonderegger**

# APPLES

... the choice  
of successful  
orchardmen  
everywhere

A 5-year-old Winter Banana apple tree in the orchard of Mr. H. O. Klose of Bertram, Kansas. Mr. Klose writes: "This is the second crop from this Sonderegger tree."

## Prices of All Apple Varieties

	Per 1	3	10
2-3 ft. 2 year roots, 1 year tops, well rooted, partly branched, prepaid	\$0.33	\$0.90	\$2.65
3-4 ft. selected No. 1 trees, well rooted and branched, prepaid	.45	1.20	3.60
4-6 ft. Extra heavy trees, splendid roots, and perfect crowns	.55	1.55	4.60
5-7 ft. for quick crop, the best trees on the market.	.68	1.85	5.90

Our 4 to 7 ft. trees are too large to be sent by parcel post. We ship them by freight or express, and pay the transportation charges, if your order amounts to \$15.00 or more (Evergreens and seeds not included).

## WINTER APPLES, LATE

These apples ripen late, and keep well, most of them until spring. From many years of experience we have a selection of what we consider the choicest and most satisfactory varieties.

**Winter Banana** Comes from Michigan; a hardy tree. Most productive and bears quite young. Rich in flavor, spicy and aromatic; flesh yellow, firm and juicy. Color a golden yellow; very attractive, and a good keeper. The vigorous healthy growth of this tree, its extra large leaves would even make it a desirable shade tree on the lawn. I recommend this apple for the Middle West, but not north of Nebraska. Ripens October 1.

**Ben Davis** For pies, baking and cooking, this apple is one of the very best. It is also an excellent keeper, one of the oldest apples in the Middle West. Ripens middle of October. Very hardy.

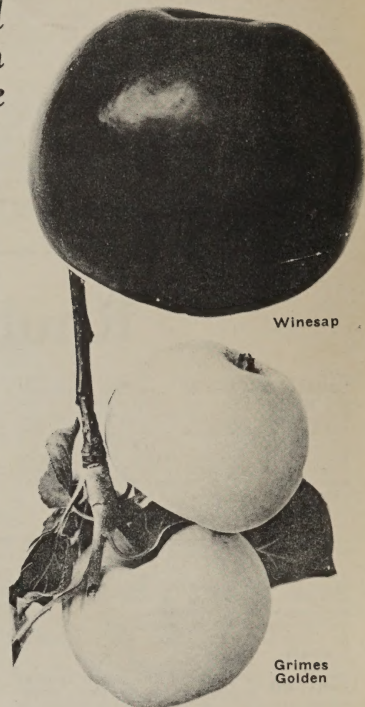

**Red Cortland** Outstanding for its young bearing, usually beginning to bear two or three years after planting. Fruit of dark red color, juicy and crisp. The tree is very hardy, can be grown up to Central Minnesota, ripening in September it will mature in the Northern apple districts.

**Arkansas Black** I recommend this apple for Arkansas, Oklahoma and north to the southern part of Nebraska. Fruit medium to large, covered with dark red, sometimes almost black. The flesh is almost orange yellow. Keeps extra well; when picked hard-ripe this apple will keep as long as the following July. Ripens middle of October. Can furnish only 3-4 and 4-5 ft. trees of this variety.

**Delicious, Yellow** An apple of medium size, golden yellow. Possesses a rich flavor, resembling that of pears, quite sweet. It is one of the finest table apples you can get. Perfectly hardy here, and most anywhere in the Middle West; bears young. Ripens first week in October. Add 15c per tree to prices quoted above.

**Delicious, Double Red** Delicious is the best paying apple on the market, and in this improved double red strain the special dark red color develops early in the ripening season, and evenly, covering the entire apple. Due to this fact, the apple can be picked while still perfectly hard, and having its extra fine color. Hard-ripe picking makes this apple the longest keeper of any. Ripens October 10. Hardy in the Middle West, and the tree is a vigorous grower.

**Grimes Golden** Contains practically no acid. Combines a rich aromatic flavor with an attractive golden yellow color, and a long season of usefulness. It is one of the oldest apples in America, and still one of the very best. The tree is healthy, a good grower, and bears well, but should be pruned annually as it is inclined to grow bushy. Do not plant it north of the middle of Nebraska. Ripens end of September.

**Jonathan** For flavor, juiciness, in fact for a good eating apple I cannot name you a better apple than the old fashioned Jonathan. It is an apple of medium size, the tree is hardy up to the middle of Nebraska, and bears well. It keeps until about January in ordinary cellars. Ripens end of September. Except in the extreme North where it would not be hardy, a few Jonathans should be in every home orchard.

**Lady Jonathan** Originated in Central Nebraska, it is a little harder than the old fashioned Jonathan. It is superior to the latter in its keeping quality, and the apples will average a little larger in size. Ripens October 1. Add 10c per tree to prices quoted.

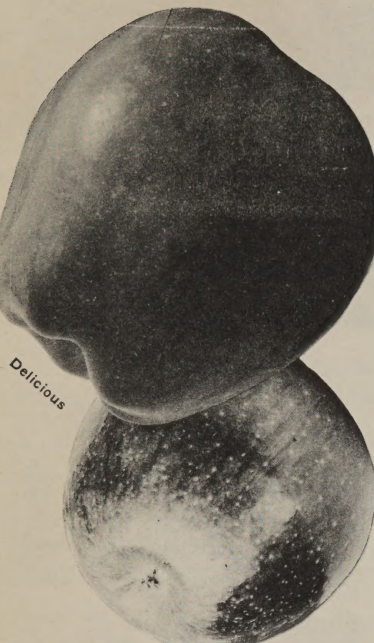

**MacIntosh Red** A sport of the old Snow Apple. Originated in Canada. In Wyoming, Idaho, Montana and high altitudes of New Mexico my customers favor this tree, and for years I have recommended it for these states, and wherever you need an extra hardy apple this variety will please you. Bears well, and the fruit is of fair quality. Ripens middle of October.

**Rome Beauty** A good apple, particularly for the Pacific states, and the eastern states, also Ohio and Indiana. Fruit large, yellow with red; very juicy, blooms late, and ripens in October.

season's best

Wealthy

**Northwestern Greening** Vigorous grower, extremely hardy; does well most anywhere, especially in the North and Northwest where few apples of such high quality grow successfully. Keeps well, fruit is large, greenish yellow when ripe. One of the best for baking. Restaurants pay premium prices for them. Ripens middle of October.

**Stayman's Winesap** A popular market apple, very large, striped dark red, keeps well, and is in strong demand for cooking. Ripens in October.

**Turley Winesap** Bears even heavier than the old fashioned Winesap, darker color, improved quality, highly flavored; keeps well until mid-winter; is considerably larger than Winesap. Price is 10c per tree in addition to the price of other apples as quoted.

**Old-Fashioned Winesap** A good tree for home orchard. Apples little too small for market; quality is good, keeps well. Dark red. Tree bears heavy, perfectly hardy in the Middle West. Ripens middle of October.

**York Imperial** (Johnson's Fine Winter Y. I.). This old-fashioned apple is rapidly coming back to popularity. It is a large red apple, tender and juicy. Perfectly hardy in the Middle West, also Southern Minnesota and Wisconsin. I recommend a combination planting of York Imperial and Stayman's Winesap for extra heavy bearing. Ripens first week in October.

## FARM-HOME Apple Orchard COLLECTION

1 Red Delicious	1 Wealthy
1 Winesap	1 Duchess
1 Grimes Golden	1 Yell. Trans.
1 Jonathan	1 Dolgo Crab

All 4-6 ft. No. 1 Trees.

**FREE** 3 Pink Spireas Billardi **\$3.30** By Expr.

### FALL APPLES

Ripening between early apples and late (winter) apples, they keep fairly good, and in the extreme North where late apples would not mature, these fall apples are considered winter apples and in such localities will make very good keepers. They furnish fruit after the early apples are used up, and before the late varieties commence to ripen.

**Anoka** A nice apple of fairly good size, yellow with red stripes. Ripens end of August, and makes a nice apple for the North. Not a new apple. For a good many years I have grown this sort for special orders, and recently, due to increased demand, I have grown more of them. Add 10c per tree to the prices quoted for apples.

**Wealthy** This apple does well most anywhere and can safely be planted in the North also. It is a great bearer, in fact few varieties are so hardy and so productive. A good apple for eating, cooking, drying or pies; large, mostly covered with red, fine grained and juicy. Without this good apple your orchard is not complete. I recommend it, knowing how pleased you will be with your Wealthy apple. Ripens in September.

**Maiden Blush** A standard market apple, good in size and quality. Its nice appearance helps to sell it. Ripens in September.

### EARLY APPLES

Early apples are hardy anywhere, and they bear extra well. Due to the fact that they cannot be kept very long after ripening, they should be planted in small numbers only, unless there is a large city nearby where early apples would find a good and profitable sale.

**Duchess of Oldenburg** Medium in size, greenish yellow with red stripes. Bears heavily. It is a little sour, and on that account an excellent apple for cooking. The tree is a wonderful grower, making a large crown, with a heavy foliage. If you would need a combination fruit and shade tree this apple would do well, and for that purpose I recommend the 4 to 6 ft. size for planting.

**Early Harvest** The first apple to ripen; with us here usually about July 4. On the farm my father counted this apple and Mayflower Early peaches to be the earliest of the large fruit trees. You must grow these trees yourself to appreciate fruit of such quality and so early in the summer.

**Red June** An old-fashioned early apple. Have small supply of trees on hand; order early and reserve your Red June apples. Ripens with Yellow Transparent; medium size, yellow with red stripe.

**Yellow Transparent** Ripens a few days after Early Harvest. It is of pale yellow color and larger than the Early Harvest. Flesh white, of finest quality. The tree bears very young and is perfectly hardy. This is one of the finest early fruits that can be grown in any locality.

A view in the orchard of Mr. A. E. Young, of Tecumseh, Neb. "Trees purchased from Sonderregger," says Mr. Young. Trees like these are something to be proud of.

**Dolgo** The Dark Red Jelly Crab. The high quality of this beautiful red crab apple, the abundance in which they are produced, and the hardness of the tree, will satisfy you in every respect. For the finest jelly use Dolgo Crab apples. The tree bears young, and grows well. If you plant the 4 to 6 ft. trees you can grow Dolgo into a very pretty shade and ornamental tree on the lawn or wherever you like to have a tree of good appearance. Dolgo is hardy everywhere, and will supply you with its wonderful fruit for many years.

**Whitney** THE SWEET CRAB. The apple is of good size; 1 would say on the average as large as the old-fashioned Winesaps. It is green with red stripes, good for raw eating and for cooking. In the North this is considered a very good summer apple. Whitney, Dolgo Crab, Duchess Apple, the Superb Apricot all make very good shade trees, and it seems to me that at this time when so many old shade trees must be replanted it would be well to include a few of these trees for shade as well as fruit for planting around the home. Especially on the farm such trees would be of great value, and if you select the large size, 4 to 6 ft. trees, you will have no difficulty growing them to nice shade tree shape.

**Yellow Siberian** The apple is quite small, comes in clusters, and is canned with the stems. The tree is perfectly hardy, and same as the above varieties it is a vigorous grower, making a well shaped, pretty tree. There are few forest or shade trees that would be more valuable in years to come for their shade as these Crab Apples, and of the latter you are sure to get nice crops of fruit. For home use as well as market Crab Apples are quite valuable. My advice is that you plant more of them. Can furnish only 5 to 7 ft. trees of this variety.

### PLANTING INSTRUCTIONS

Plant Apples 30 by 30 feet apart, or plant 35 by 35 feet apart, and plant a filler tree between each 2 apple trees. For filler trees we recommend Plums, Cherries, Dwarf Pears and Peach trees. These fillers will give you an early income from your orchard, and can be removed when the apples require all the space in later years.

Plant apple trees about 2 inches deeper than grown in the nursery. Water well at planting time. Apple trees need pruning after planting. Cut all limbs back to one-half of their length, the leader may be cut back a few inches. If you want our men to prune your trees before shipping, please give this instruction in your order by stating: "Prune Ready for Planting."

# Hardy PLUMS

for heavy and  
young bearing.

Like gigantic Grapes the limbs of a Sapa Plum (at left), loaded with delicious fruit, Opata Plum (right) and all other Hansen Plums are equally heavy producers, and our heavy bearing strain trees begin to give excellent crops the second year.

## PRICES OF PLUMS (except European Plums)

	1	3	10
2-3 ft. well rooted, prepaid.....	\$0.38	\$1.00	\$3.10
3-4 ft. nice trees, prepaid.....	.50	1.35	4.00
4-6 ft. 2-year crowns, well branched.....	.60	1.65	5.00
Special Grade extra heavy roots, stems and crowns for immediate bearing .....	.70	1.95	6.20

### Red Wing, Minnesota Plum

Yellow, overlaid with red; freestone; sweet, and of good quality. For raw eating or prepared like peaches with cream and sugar. An abundant bearer, and perfectly hardy.

**Waneta** The largest of all Hansen Plums, and one of the largest in existence. Red with blue bloom; very good quality. The tree is extra hardy; you can grow this plum anywhere; it bears very young, and most freely.

**Hanska** Bright red, heavy blue bloom, firm flesh, which has a very pleasing Apricot flavor. Being a Hansen Plum it is very hardy; bears young and heavy.

**Sapa** Glossy dark purple, flesh is of the same color, and is of excellent quality. Bears young and very heavy.

**Opata** The earliest of the Hansen Plums. Dark purplish red with green flesh, and very pleasant flavor. Ripens end of July. On top of this page, note the branch taken from Opata, a sample of the bearing ability of Hansen Plums, such as Opata, Sapa, Hanska, etc.

**New Ember** Minnesota No. 83, an blushed with red, ripening in September. This new Plum is a vigorous tree, and a very good bearer. The excellent quality of its fruit will undoubtedly make this one of the most popular Plums in years to come. No extra charge.

**Omaha Native** Fruit dark red sweet, well flavored. The tree is exceptionally hardy; will do well even in the extreme North. Omaha is a sure and heavy bearer.

**Golden Rod, Native** The finest yellow plum, sweet and tender with very good flavor. Bears young and freely.

### Compass Cherry Plum

Cross between a Cherry and Native Plum, growing to a size of 10 to 12 ft. similar to a Plum tree in appearance. The fruit is larger than Cherries, small pit, in great favor for canning and preserves. It is an enormous bearer, and begins to bear very young, sometimes as a yearling. A few of these trees should be in every garden. Perfectly hardy. Prices same as Plums.

### Sonderegger's Sweet July Plum

It is not only the finest of all Hardy Plums I have ever found, fortunately it is also the hardest of this strain. I recommend it for Nebraska and Iowa, the states south of here, the Great Lakes region and the Eastern states. In fact, most anywhere except the extreme North it will give best satisfaction. Large, red with small pit, flesh yellow, excellent flavor. Very good table and canning plum. Will come into bearing almost as young as the Hansen Plums, and bears just as heavy. Be sure to include this plum in your planting. 3-4 ft. trees, 75c each; 3 for \$2.00. 2-3 ft. trees, 55c each; 3 for \$1.50; postpaid.

## "Big 4" Plum Special

1 WANETA  
1 SAPA  
1 OPATA  
1 GOLDEN ROD

3-4 ft. trees.

**\$1.50**

**FREE** 2 Firebush, 18-in. Flowering Quince Express

## EUROPEAN PLUMS

PRICES OF ALL VARIETIES LISTED BELOW

	1	3	10
3-4 ft. very nice trees, prepaid .....	\$0.58	\$1.60	\$4.90
4-6 ft. extra fine trees. ....	.70	1.90	5.90

**Lombard** The hardest of the European Plums, and does well in light soil. Can be planted as far north as the middle of Nebraska, and bears well here. Fruit oval, violet red, with a yellow, juicy flesh; freestone. Ripens here end of August.

**Shropshire Damson** The small blue Damson; well known, and in great favor for plum preserves and plum butter. The tree bears heavily, and it is dependably hardy up to and including the southern half of Nebraska. Deserves a place in every garden or orchard.

**German Prune** A large, oval, purple-prune, free-stone. Flesh sweet and of pleasant flavor. It is firm, very good for drying or preserving. This tree is not hardy north of here, but is much harder than the Italian prune (Fellenbergs), which it resembles closely in size and quality.

## PLANTING INSTRUCTIONS

Plant all Plums so deep that the bud (a short bend just above the roots) will stand about level with the ground. Water well at planting time to settle the soil properly. Cut all limbs back to one-half of their original length. If you wish to have your trees pruned here by our men, reading for planting, please state in your order "Prune Ready for Planting." Plant plums between apple trees as fillers, or plant not less than 18 ft. apart. Plant European Plums not less than 25 ft. apart. For best pollinizing and bearing always plant two or more plums in one orchard.

**Paw Paw** (Asimina) A small tree with purple and whitish flowers and handsome foliage. The large fruit, banana-shaped, is edible and improves by cultivation. This has been a native tree in Nebraska, Kansas and most Midwest states, and should be replanted. Of value for ornament as well as for the fruit. Nice 3 to 4 ft. trees, 50c each, postpaid.

# Early Bearing APRICOTS

## PRICES OF BUDDED APRICOTS

	1	3	10
2-3 ft. healthy trees, prepaid.....	\$0.45	\$1.30	\$4.00
3-4 ft. well rooted, fine stock, prepaid.....	.60	1.60	5.00.
4-6 ft. heavy, well branched trees.....	.73	2.15	6.80

The 4 to 6 ft. trees are too large to go by parcel post. The freight will be paid on shipments of trees amounting to \$15.00 or more, not including Seeds or Evergreens.

## 2 Special Hardy Types

**Superb Freestone**, a very hardy Apricot, and since years the favorite with most fruit growers. The fruit is as good as the finest, the tree is an abundant bearer, and it is hardy throughout the East and Middle West, except in the very extreme north. This tree also makes a very nice, well shaped shade and ornamental tree.

**Moorpark, American Apricot** Freestone, very large, yellowish-green with red on sunny facing. One of the best Apricots for the market. Excellent for drying and canning. Not hardy north of Southern Kansas and Missouri.

**Manchurian Apricot** Produced by Prof. Hansen of Brookings, S. Dak., special breeding for drought resistance, and greater hardiness, without affecting the splendid quality of Superb. These trees can be grown anywhere in the North, and, of course, will also give excellent results in other states. Add 10c per tree to prices quoted above.

## Nut-trees for every purpose

### Butternut, White Walnut

One of the finest native trees, and often planted for a shade tree. Hardy as far north as South Dakota. The nuts are large, long, quality good. 12 to 18-inch seedlings, 3 for 40c; 10 for \$1.00; 25 for \$1.50; 100 for \$4.00; prepaid.

### American Sweet Chestnut

Does best in medium light, partly sandy soil, no pruning required, and little or no cultivation. Makes a very pretty tree, and also produces nuts of fair quality. I consider it hardy as far north as the southern part of Nebraska, farther north the tree will be hardy but will not produce fruit. For a number of years I have not listed this tree. I am doing so this year on the request of many of my customers. I have very nice trees in stock. 2 to 3 ft. size, 50c each; 3 for \$1.30; prepaid.

### Sieboldi Walnut

Makes a very pretty tree which bears young and abundantly. The nuts come in clusters, East coast states and from there west through southern Illinois, Indiana, southern Missouri and Kansas. There are some of them growing in Nebraska, but they are not sufficiently hardy to be profitable in this state. The nuts come in clusters, they are heart shaped, easy to open, contain a nut meat of high quality. For the localities recommended this tree will be most satisfactory and should be planted much more freely. 2-3 ft. nice trees, 85c each; 3 for \$2.25; prepaid.

### Black Walnut

Makes a large tree, and especially on bottom land a fast grower. Besides being a very good shade and ornamental tree, the Black Walnut is the most valuable native tree for its wood. The nuts are hard shelled, but the meat is very tasty. I can supply seedlings of this tree (see page 11) and the following sizes of transplanted, straight trees:

	Each	3	10
3- 4 ft. trees.....	\$0.30	\$0.80	\$2.20
4- 5 ft. trees.....	.45	1.20	3.50
5- 6 ft. trees.....	.65	1.80	5.20
6- 8 ft. trees.....	.90	2.20	6.50
8-10 ft. trees.....	1.00	2.50	7.50
10-12 ft. trees.....	1.50	4.00	...

By Express or Freight.

### Stuart Pecan

Hardier than the Common Pecan, and can be grown as far north as southern half of Missouri, southern Illinois and Indiana. The nuts are large, thin shelled, the quality of which is very good. Plant them for home use and market. 2-3 ft. grafted trees, \$1.00 each, prepaid.

### Hazelnut

This is the old fashioned hardy type producing nuts of medium size. An upright growing bush, very useful for hedges or screens, or to make up the lower growth of the windbreak. Sometimes included in ornamental plantings for tall growth. 2-3 ft., 3 for 40c; 10 for \$1.00; prepaid.

**Russian Mulberry** A very hardy tree, has stood 30 degrees below zero, without failing to bear a good crop of berries the following season. Makes a large, spreading crown for a beautiful shade tree. Berries appear in enormous quantities, in black or white color, sweet, and mostly used for canning with Rhubarb, or Gooseberries. Farmers and all bird-lovers should promote the planting of this tree. For hedges and post-growing plant the seedlings on page 11. Nice, well shaped, transplanted trees:

	Each	3	10
4-5 ft. nice trees.....	\$0.50	\$1.35	\$4.00
5-6 ft. heavy trees.....	.65	1.80	5.60
6-8 ft. extra heavy.....	.80	2.20	...

By Express.

## PERSIMMON

Can be grown as far north as the southern half of this state. The fruit is medium size, and must be fully ripe before it is good to use. Price: 12-18 inch nice seedlings, 10 for 50c; 25 for \$1.00; 100 for \$3.00; prepaid.

## PLANTING INSTRUCTIONS

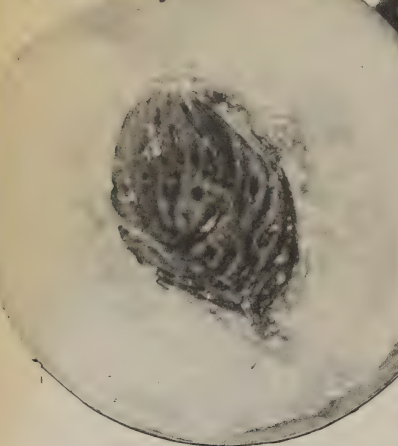

Nut trees have large, heavy tap-root systems, without stringy fiber roots. The holes for planting therefore must be rather deep. Always use good top-soil to fill in around roots, never mix manure or other humus with the soil that will come in contact with the roots. Pruning of nut trees is not necessary, we prune the large sizes of Black Walnut before shipping, they can be planted just as they come to you.

We ship small plants such as strawberries, bulbs and perennials separate from trees or shrubs. When you receive our shipments and find any tree or plant damaged, just drop us a card; replacements or an adjustment satisfactory to you will be forthcoming promptly. If an item is short in your order we have a record of it, and forward the missing item separately at proper planting time. There are cases in which it is best to make two shipments in order to plant everything at its proper time.

Nut trees cannot be shipped into California.

Your Own Home-Grown Fruit Is Always the Best.

# Sonderegger Hardy PEACHES

J. H. HALE  
Hardy, extra  
large peach.

## PRICES OF ALL BUDDED PEACH TREES

	1	3	10	25
2-3 ft. well rooted, prepaid.....	\$0.29	\$0.75	\$2.10	\$4.80
3-4 ft. branched, prepaid .....	.37	1.00	2.85	6.20
4-6 ft. strong, branched trees .....	.45	1.30	3.90	9.00

Trees of 4 ft. and up are too large to be sent by parcel post. If your order amounts to \$15.00 or more (not including seeds) I pay the freight on the shipment.

**Elberta** Freestone. The best known market peach, large, yellow with red cheek; flesh yellow, firm, good quality. Not hardy in Nebraska. Does well in the South, in Ohio and Michigan. Ripens in August.

**South Haven** Freestone. A medium to large peach, yellow, flushed red, with yellow meat, a peach of excellent quality. In hardness it compares with J. H. Hale, and most of the hardier types of budded peaches.

**Belle of Georgia** Freestone. Very large, white with red cheek, flesh white and firm with excellent flavor. Hardy most anywhere south of here. Ripens early in August.

**Champion** EXTRA HARDY. Freestone. Good medium to large size, creamy white with red cheek. Excellent flavor, sweet, rich and juicy, white meat. Champion is one of the hardiest peaches you can grow. I recommend it highly for the Middle West, and anywhere on the northern edge of the peach belt. Ripens in August.

**Early Elberta** Freestone. A little larger than Elberta, in other respects the same, except that it ripens almost two weeks earlier. Very good for Southern Illinois, Indiana, Southern Missouri and Kansas, but not hardy north of there.

**Fitzgerald** Freestone. In hardness and productivity as good as Champion, the only difference is the color of the flesh. Fitzgerald is yellow meated, same high quality as Champion.

**Mayflower** Semi-Cling. This and Alexander Early are the earliest peaches you can have. White meated, good size, and fine quality. Gets a nice red color even before fully ripe, blooms late and is fairly hardy. Ripens early in July.

**J. H. Hale** Freestone. Large size, beautiful rich orange yellow color with carmine cheek, smooth, a very good peach. See picture on top of this page. Does well as far North as the middle of Nebraska, and anywhere South and East of here. Ripens end of August.

**Heath Cling** Clingstone. Best for pickles, large, round, white-meated, juicy, highly flavored. Hardy here, but not in the North. Ripens in October.

**Polly** Freestone. One of the surest bearers. Claimed to be even harder than Champion. Medium size, good flavor, white-meated, ripens in August. Add 10c per tree.

## New Goldmine Nectarine

The Nectarine is a smooth-skinned peach, about the size of a medium Peach, wax-like in appearance, and a highly desirable fresh table fruit. Goldmine is a late introduction, the fruit is slightly flushed red, flesh almost white. The tree is a nice producer, and is hardy as far north as the Southern half of Iowa and Nebraska. Nice 3 to 4 ft. trees, 70c each; 3 for \$1.85; prepaid.

The famous Champion Peach, besides its outstanding quality for canning and fresh fruit, runs unusually even in size, comparing with the normal run of Oranges.

## My hardy Peach Collection

1 Belle of Georgia 1 Polly  
1 Champion 1 J. H. Hale

All nice 4-6 ft. trees.

For Only **\$1.75** By Express  
Free 1 Lilac, 2-3 ft. shrub.

## PLANTING INSTRUCTIONS

Peach trees require a heavy pruning at planting time. Cut all branches back to within about 1 inch from the stem. This will give the new growth a good shape, and the tree will make a more compact crown. It is further advisable to give Peaches a summer pruning (1st of July) in the second year, cutting off just the ends of all new branches. This will produce a nice crop the following year. Peaches, selected properly as to locality, give good and quick results anywhere. Our selection is one of the choicest on the market, having been put through every possible test for dependability and hardness.

# Home Garden Berry Collection

5 Chief Raspberries  
5 Latham Raspberries  
3 St. Regis  
5 Cumberland, black

All for

95c Postpaid

Free:  
3 Boysenberries

## The Six Best Extra Hardy, Heavy Bearers

**Red Raspberries** Plant them 3 ft. apart in the row, the rows from 5 to 6 ft. apart. Plant in trenches, cover 1 inch deep, fill in 3 inches more after the new growth comes through. 1 inch out ends of new canes at 2½ to 3 ft. height.

**Chief** The finest early Red Raspberry known, both for home use and market; a heavy producer, in quality and size about the same as Latham but 10 days earlier.

**Latham** Latham is the most popular Red Raspberry on the market, the best midseason variety. Berries of excellent quality, bears heavy.

**St. Regis Everbearing** Bears over a period of four months. Is very hardy, berries large and sweet. For home use St. Regis will produce nice berries for you for fresh use throughout summer and fall.

**Columbian, Purple** The only berry that will not make root suckers. L productive, excellent quality, the berries are large, purple-red, and the plants are very hardy.

**Black Raspberries** Planting distance same as for Red Raspberries. The black varieties are much hardier, and will not make root suckers. They are particularly good for the North, where the Red Raspberries are not hardy enough.

**Cumberland** A very hardy type, a good and dependable bearer. Berries large, black, very firm. The plant does not make root suckers.

**Quillen** Hardy most anywhere in the North, a most abundant and sure bearer, and the berries are as good as the best in quality and size.

### BLACKBERRIES

**Mersereau** Early, a fine, large berry, black and sweet, without core. Due to its hardness Mersereau is one of the best Blackberries for the Middle West. It is a good producer, and the quality of the berry is as good as the best.

**Blowers** Large berries, jet black, good shipper; favorite with market growers. Highly productive.

**Brainerd** Bears well over a long season, and produces a lot of berries. Berry of the Giant Himalaya type, plant very hardy, and a vigorous grower. Planted especially in the Middle West and Northwest.

### CURRENTS

**Perfection Currant** It is the largest of the red currants, bearing remarkably well. Berries not very sour, few seeds, and bright red. Perfection is of excellent quality for canning and jelly, due to the large fruit and clusters, you can pick a basket full of Perfection Currants as quick as picking cherries. Perfection is hardy anywhere in the Middle West. It should be the main variety in every Currant planting.

**White Grape Currant** A sweet white Currant, and a good bearer that can be grown anywhere, except the extreme North. For fresh eating you will find this berry better than the Red Currants. White Currants are quite sweet, having little of the acid of red varieties.

**Red Lake** A new Currant of outstanding merits. Berries extra large, light red, very juicy, few and small seeds, and with a most pleasant flavor. A further special advantage is its resistance to Currant rust.

### GOOSEBERRIES

OREGON CHAMPION, FINEST FOR PIES AND CANNING

The shrub is a strong grower, not very thorny, the berries are of medium size, finest quality for canning and for pies. For regular and heavy crops Oregon Champion is of outstanding value. It is hardy. 2-year No. 1 shrubs, 2 for 59c; 5 for \$1.35; 10 for \$2.25; prepaid.

**Chautauqua, Giant Size, Sweet** By far the largest berry; excellent for canning, pies and for fresh eating. The only Sweet Gooseberry on the market. The bush is of spreading habit, hardy anywhere in the Middle West. Bears almost as heavily as Oregon Champion. Nice plants, 50c each; 3 for \$1.20; 10 for \$3.50; postpaid.

### PRICES OF ALL RASPBERRIES AND BLACKBERRIES

Your Own Home-Grown Fruit Is Always the Best.

# Restock Your Timber and Woodlots. Plant This Spring.

**Ash, White** *Fraxinus Americana*. Fraxinus very valuable for lumber and fire wood. The Ash is a hardwood tree and probably one of the fastest growers of the hardwood type. Does well anywhere, perfectly hardy even in Canada; also, resists the heat and drought of the Middle West. White Ash should be in every wood-lot planting.

By Express:	25	100	300	1000
12-18 inch.....	\$0.30	\$0.90	\$2.65	\$8.00

Prepaid:				
12-18 inch.....	.40	1.00	2.95	...
18-24 inch.....	.65	2.20	5.60	...

**Catalpa Speciosa** The Hardy Catalpa. This is a tree of tall, upright growth, large light green leaves. To make up the tall growth in a windbreak, one row of these Catalpas in the center will be very effective. The wood of this catalpa is of great value for posts, and due to the rapid growth of the tree, and its straight, tall stem, the posts are easy to grow, and are very straight. Having hard wood, the posts last for many years.

By Express:	25	100	300	1000
12-18 inch.....	\$0.40	\$1.30	\$3.50	\$10.00

18-24 inch.....	.70	2.20	5.60	...

**Caragana** Siberian Pea Tree. Excellent for ornamental screens and windbreaks. The tall, upright growth, attractive foliage, and a profusion of yellow flowers in the spring have put the Caragana in the foreground for windbreak-border. It is extremely hardy; can be grown with best success anywhere.

Not prepaid:	10	25	100	300
12-18 inch plants.....	\$0.40	\$0.75	\$2.60	\$7.00
Prepaid:				
12-18 inch plants.....	.50	1.00	3.25	7.90

**American Beech** *Fagus Americana*. The regular Beech, a majestic tree of hardwood type. Very popular in the East, but the tree is almost unknown in the Midwest. We are offering this tree at the request of many of our customers. 12 to 18 inch, nice seedlings, 10 for 50c; 25 for \$1.00; postpaid.

A windbreak or shelterbelt can be highly attractive, as this picture shows, with Thornless Honey Locusts adding a park-like effect to the main planting, which is bordered with Old-Fashioned Lilacs. A shrub row in the windbreak always serves as a snow-trap. For this purpose besides Lilacs we recommend Hansen's Bush Cherry, Caragana, or for a heavier growth Mulberry or Chinese Elms planted 3 ft. apart, and cut back for low bushy growth.

# SMALL TREES and FOREST TREES

## Special LOW PRICES

### NOTICE!

All grades of seedlings, shrubs and trees offered in this book are measured not including the roots. As many other nurseries measure roots and all in their grades, my 6 to 9-inch seedlings would correspond with an 18-inch grade of other quotations. It is therefore well that you make certain of the actual size of stock you buy.

**Cottonwood** *Populus. Sargentii*. The native timber tree. Very common along streams where it holds the soil well and reaches mammoth dimensions, in thickness of its stems as well as the spread of its lofty crown. The Cottonwood withstood the drought and the cold remarkably well.

**Elm, American** *Ulmus Americana*. I know of no other shade and timber tree that would be so popular as the American Elm, especially in the Middle West. It is a fairly rapid grower and is hardy most anywhere. The tree makes a large spreading crown, very suitable for shade and street planting. Include American Elm in your wood-lot or timber planting.

### Spacing for Windbreak

Rows can be placed from 12 to 20 ft. apart, and the seedlings can be planted in plow furrows, 3 or 6 ft. apart. Cultivate for the first and second year, to keep ground clean. Thin the trees out when the limbs begin to touch, cutting out every second tree. The result is a straight growth, elimination of wind damage while trees are small, and a much better stand. Three and four-row windbreaks should have a shrub-row on the weather-side acting as a snow-trap. Write us at any later time for advice you may wish concerning the proper upkeep of your windbreak.

**Chinese Elm** *Ulmus Pumilla*. When you plant Chinese Elms be sure they are the true hardy *Ulmus Pumilla* strain, because not all Chinese Elms are fully hardy. My seedlings are of the northern hardy type which can be planted safely anywhere and will be perfectly hardy. The Chinese Elm is the most rapid growing tree; it has also come through our last four years of extreme drought in remarkably good condition. Farmers everywhere, as well as townpeople, are replanting much of their lost trees and timber with Chinese Elms, knowing how fast the tree grows. A protection to nearby fields from hot winds, a snowtrap in the winter.

**Hackberry** *Celtis Occidentalis*. A most valuable tree that should be included in any timber planting. One of the very best for a long-lived shade tree. Very hardy, and unusually drought-resistant. I recommend it especially for wood-lots and for shade.

By Express:	10	25	100	300
6-12 inch, well rooted, very choice.....	\$0.25	\$0.40	\$1.30	\$3.50
Prepaid:				
6-12 inch.....	.30	.50	1.50	4.00

**Russian Mulberry** *Morus*. There is no other tree that would combine so many good features. The tree is entirely hardy, resists drought well, is even successful in alkali soil. Grows very rapidly. It is a perfect boarding house for song birds and bees. The wood is very valuable, especially for posts which are very lasting, and can be grown in a short time. Finally, the seedlings can be planted like Privets for an ornamental hedge.

# for WINDBREAK WOODLOTS

## EROSION CONTROL

**Black Locust** *Robinia Pseudoacacia.* In great favor for Erosion Control. It holds the soil firmly even on extremely steep ground, due to its habit of forming a dense network of roots, which sometimes make sprouts. This tree grows fairly fast; it is a valuable tree for its wood, also.

By Express:	25	100	300	1000

3-4 feet.....	.85	2.65	6.80	...

**Honey Locust** *Gleditsia Triacanthos.* This Locust will positively not make suckers from the roots. You can grow pasture or lawn grass under this tree, and the grass will do extra well in the shade of this Locust. It is a clean tree, of the hardwood type but growing quite rapidly. Perfectly hardy everywhere, resists drought extra well. For timber, wood-lots, for shade in grazing grounds, and, due to its very stout thorns, for strong, protective cattle fences. For theft and cattle proof fences plant 18 inches to 2 feet apart in the row.

By Express:	25	100	300	1000

12-18 inch.....	.45	1.35	3.40	8.70
18-24 inch.....	.60	1.70	4.50	...

**Proper Planting** Upon receipt of the roots in cold water for a few hours. Before taking the stock out for planting, dip the roots in a thin paste of mud, plant with plenty of mud sticking to roots. This protects the roots best from wind and sun. Plant seedlings 1 inch deeper than grown before in the nursery.

**For Good Timber** Bur Oak, Locusts, Ash and Black Walnuts.

**For Posts** Catalpa and Russian Mulberry.

**For Permanent Pasture-land** Honey Locust protects sod, gives good shade for cattle, does well most anywhere.

**For Erosion Control** Cottonwood along the streams. On steep upland, Black Locust and Hackberry.

# Farm Hedges for Shelter Belts. Protect Your Fields.

**Russian Olive** *Eleagnus Angustifolia.* A medium size, clean tree, very hardy. Fine for windbreak, snow-trap, also for ornamental hedges. Foliage silvery-white.

By Express:	10	25	100	300
6-12 inch.....	\$0.30	.60	2.00	5.20

12-18 inch.....	.50	.95	3.20	8.20

**Black Walnut** *Juglans Nigra.* No timber or wood-lot is complete without a few rows of Black Walnut; even in the windbreak the taller growth of Black Walnut is very desirable for the center rows. Tree hardy, grows fairly fast, on low land, creek bends, etc. It grows as fast as softwood trees. Of special value for its wood. A Black Walnut timber on your farm represents most appreciable assets.

An Evergreen windbreak is the most valuable of all farm improvements. As it takes longer to grow a good Evergreen windbreak, we recommend a windbreak of other trees for quick results: the Evergreen windbreak can be started in a separate strip, joining the deciduous windbreak. The latter to be used in later years as a wood-lot, when the Evergreens give sufficient wind protection.

## Evergreen Seedlings

**For Windbreaks:** How to Plant. Plant the seedlings in beds 12 by 24 inches apart. Shade the bed for the first year or two with burlap or lath top. Cultivate and water frequently. Within two growing seasons you will have nice little trees, transplant them with complete root-balls to your permanent windbreak.

**Delivery in April** Evergreen seedlings can be furnished in April, at no other time of the year. They will be dug just before the shipping, therefore perfectly fresh. Keep the roots protected from wind and sun while you plant.

## Sonderegger Trees

Their Better Roots  
Perfect Shapes  
for Better Results

# Ornamental and Shade

A beautiful specimen of American Elm in a Beatrice park; the silver-leaved tree at left is a Russian Olive.

**American Elm** "The Patriarch" of our Midwest Native shade trees. The American Elm shown in the picture above has taken the punishment of two disastrous droughts, two grasshopper plagues, and the severe climatic conditions of our state. Planted by early pioneers, its sturdy crown, and its healthy condition today is indeed all the proof we need when we say: the American Elm is a time-tested tree, hardy, its beauty even improving with age, and suitable anywhere for a fairly rapid growing shade tree. Our trees have been grown for an extra vigorous root-system, and are carefully selected for good straight bodies. These trees will assure you of the best results.

**Chinese Elm** Our Chinese Elms are of the true *Ulmus Pumila* type which is extremely hardy, and of the most rapid growing habit. For very quick results there is no other tree that will take the place of the Chinese Elm. Our selected, extra heavy rooted trees will grow with enormous speed to give you shade or wind protection in record time. These trees have all been transplanted once in the nursery, do not compare them with seedling trees which are much lighter in caliper of the stem. Our sizes of trees are always measured from the ground up, assuring you of full measure.

**Elm, Moline** A special type of Elm that is just as hardy as the others, but differs in its habit of growth, being a tall, upright grower, almost like the Poplar. It is a rapid grower, the leaves are larger than those of the common Elm. For an erect, tall grower, you will find this Elm highly satisfactory.

HACKBERRY

## Ash, American

*Fraxinus Americana*. Grows well most anywhere, requires very little attention, and makes a very nice well-shaped crown. Exceptionally hardy, drought resistant; one of the fastest growing hardwood trees.

**Ash, European Mountain** *Sorbus Aucuparia*. A hardy tree of medium size, smooth bark, dense even top, bearing from July till winter, large clusters of bright red berries. A fine lawn tree.

## Catalpa Speciosa

Hardy Catalpa. An effective, tall tree of tropical appearance with its very broad, large, light green leaves, and purplish-white blossoms. It grows rapidly, and resists drought remarkably well. Can be grown as far north as the middle of Nebraska and northern Iowa.

## Catalpa Bungei

Umbrella Tree. Makes a very even globe-shaped head, dense, without pruning, and showy, with its large, light green leaves. The stem never grows taller. It is a fine showy dwarf tree for parks, lawns and cemetery planting. Hardy as far north as northern Nebraska.

## Linden, American

*Tilia Americana*. Basswood. An excellent tree for shade and ornament, keeping a clean, healthy foliage, and blooming profusely in June. Fairly rapid grower, and makes a well shaped spreading crown. A tree you will like.

**Varnish Tree** *Koelreuteria*. A scarce tree, originated in Northern China, grows to a height of 25 feet, and nice ornamental crown of spreading habit. With the large clusters of yellow blossoms in July, it makes a very attractive tree.

**Hackberry** *Celtis Occidentalis*. American Nettle Tree. A native tree with slender branches, bright shining green foliage. It grows fairly rapid, resisted our recent period of drought, and also the borers which have damaged trees in some localities. Hackberry will always remain one of the best trees for general planting throughout the Middle West.

## Kentucky Coffee Bean Tree

*Gymnocladus dioica*. A clean tree, growing fairly rapid to medium-large size, and a pyramidal shaped crown. In parks, and for natural effects a long lived, valuable tree. Foliage similar to that of the Locust, pods and seeds similar to Coffee Beans.

White Birch in one of our Beatrice parks.

**Birch, White European** *Betula Alba*. A graceful, tall tree, getting a white bark in later years. Very showy, especially in groups of evergreens. Hardy as far north as the Dakotas and Minnesota.

## Soft or Silver Maple

*Acer Saccharinum*. Another hardy native upland tree, almost as popular in the Midwest as the American Elm. It is a rapid grower, and by planting our Soft Maples you will get husky, well-shaped trees of which you will be proud at all times. Do not mistake the Silver Maple for a white-leaved tree, as the foliage of the Silver Maple is light green above, and of greenish-gray color underneath, deeply cut. The trees with the leaves of silvery white underneath are the Poplars (*Bellea* and Silver Poplars).

**Maple, Norway** *Acer Platanoides*. A hardy tree of majestic form, perfect outline of the crown. It is a hardwood tree, leaves very large, deep green, changing to a pretty pale yellow in the fall. I recommend this tree for a hardy, long lived tree of special beauty.

## Maple, Sugar or Hard Maple

*Acer Saccharum*. Makes a large pyramidal tree with large, handsome foliage of rich, pleasing green, turning red in the fall. Very hardy, although it is not a rapid growing tree for the Middle West. It is a long lived tree.

AMERICAN LINDEN

All our trees are nursery grown on upland, without irrigation. This accounts for their special hardiness, and extra well developed roots. These trees are full of life and pep; they will please you in every respect.

# TREES . . . for Every Purse and Purpose

**Locust, Honey** *Gleditsia Triacanthos*. A most valuable native tree with spreading branches, forming a large crown of very good and even shape. The leaves are small, coming in sprigs of 18 and more, always free from disease or insects. For a hardwood tree this is perhaps the most rapid grower, and is perfectly hardy everywhere. Has very prominent thorns. This Locust never makes sprouts from the roots. The Honey Locust should be planted more frequently.

## American Plane Tree

*Sycamore Platanus occidentalis*. Also called Buttonwood. A rapid growing tree reaching an enormous height and spread. Bark smooth, light colored mottled green. Very large leaves. Truly a majestic tree, in special favor for street planting in large cities as the tree stands smoke and gases quite well.

American Plane Tree

**Russian Olive** *Eleagnus Angustifolia*. A beautiful lawn tree with spreading crown, silvery gray long narrow leaves. Bark nearly black. Small yellow blossoms in the spring which are highly fragrant. Creates a striking effect on the lawn, in parks or in groups between evergreens or tall shrubs. Extremely hardy and drought resistant.

**Poplar, Bolleana** Grows to a spire of 80 ft. in height, leaves shining dark green with silvery white underneath. Hardy as far north as Nebraska. Does not make root-sprouts. A beautiful tree of striking effect in the landscape.

**Poplar, Volga** For the Middle West and the North, this tree takes the place of Bolleana Poplar, as Volga Poplar is much harder; it is also an upright grower (column shape), however, it is a little more spreading than Bolleana. The leaves are green underneath, also. Grows very fast.

**Golden Willow** *Salix Aurea*. The hardness of this tree, its resistance to wind, its rapid growth, the showy golden bark in the winter, combined, should secure a much better place for Golden Willow with landscapers and planters everywhere. Especially where the tree is needed for wind protection, it will certainly give perfect satisfaction. Easy to grow.

**Cutleaf Weeping Birch** Grows tall, with white bark, and gracefully drooping branches. Very attractive. The tree is hardy in the Middle West, except in the extreme northern part.

Thornless Honey Locust

**Locust, Thornless** *Gleditsia Triacanthos Inermis*. For street and lawn planting it is one of the very choicest long-lived hardwood trees. Without pruning it will grow up to a beautiful shade tree, developing a splendid crown. It is a fast grower, second only to the Elms. Due to an unusually deep root system, grass or flowers can be grown with best success even close to this tree; it never makes sprouts or suckers from the roots. Entirely hardy, healthy and clean.

**Nioba Weeping Willow** Near a pool, on the lawn, in parks and cemeteries, the Nioba Weeping Willow adds great charm to the landscape. Its long slender branches that touch the ground or water-edge in graceful arches, the light green foliage, and during the winter the golden yellow color of bark and branches, assure you of an attractive tree the year round.

**Oaks** The world's longest lived tree. We are listing the 3 best.

**Bur Oak** *Quercus macrocarpa*. Grows to tall tree with massive top, and short trunk, a splendid shade tree, and as a hardwood tree a fairly rapid grower.

**Red Oak** *Quercus maxima rubra*. A tall grower, with rounded crown, with wide spreading branches, and slender branchlets, perfectly hardy, and a fairly fast grower.

**Pin Oak** *Quercus palustris*. This is literally nature's gift for a medium fast growing, hardwood type tree of long life, and extreme beauty. There is no better shaped tree, its perfectly symmetrical arrangement of branches is admired by everyone, and this tree keeps its foliage throughout the winter, shedding the leaves in the spring when the new leaf-buds open.

Pin Oak

## FLOWERING TREES

**Hopa Crab** A tree of rare beauty, blooming in May, completely covered with flowers of deep rose carmine color. Out on the lawn or as a group planting, Hopa Crab is like a gigantic bouquet.

**Florabunda Crab** A very showy tree when in full bloom. Blossoms of red or reddish-pink turning almost white before they fall. The twigs are very pretty, often used for bouquets.

**Bechtel's Double Flowering Crab** (*Pyrus coronaria*). Produces a wealth of double fragrant blossoms of delicate pink color. Makes a wonderful dwarf tree, one of the finest for flowers, which can also be used in bouquets. 2 to 3 ft. nice trees, 75c each; 3 for \$2.10; prepaid.

**Prunus Triloba** A most charming little tree, blooms beautifully in the spring, blossoms double, light pink, very showy. Perfectly hardy. Makes a beautiful tree on the lawn or between shrubs.

**Hansen Purple Leaf Plum** All through the growing season a most showy tree, its reddish purple leaves showing up splendidly. As a single specimen on the lawn, or among plantings of tall shrubs with green or yellow foliage this tree shows up extra well.

**Pussy Willow** Produces the large catkins in early spring. Very pretty. The tree is very hardy, a nice upright grower, with good healthy foliage.

**Red Bud** Grows to a well-shaped dwarf tree, of most charming appearance in early spring when every twig is covered with a wealth of lilac-rose blossoms. 5 to 6 ft. trees, \$1.25 each.

Flowering Trees	(Except those quoted otherwise)	Each	3
2-3 ft. trees.		\$0.60	\$1.50

**FREIGHT:** Not included in prices quoted above. I can give you the shipping weight and freight rate on request. Please write number, size and variety you are interested in.

**QUANTITY DISCOUNT:** 8% off for pairs; 10% discount on 5 trees or more.

**Chinese Arbor Vitae** This tree came through the drought in excellent condition. Stands the winter here perfectly well. It is a fast grower, with pretty light green foliage, that can be sheared, and grows to a nice dense shape. I can furnish you this tree in natural growth for background and windbreak planting. Also in Pyramidal shapes which have been sheared for years in the growing field, and the globe shape special pruned and sheared to form a dense globe form.

**Colorado Blue Spruce** The prettiest of all Spruce sorts, perfectly hardy, with pretty needles, and a good dense growth. Fine for single specimens on the lawn, in parks or on the cemetery grounds. I have the selected good blue type.

**Juniperus Virginiana—Red Cedar** Extra hardy, and has come through the country's worst drought in splendid shape. This is the dark green strain of Red Cedar that holds the color well throughout the year. Whoever you plant this tree you make a great improvement; they make a grand showing the instant they are planted, due to their perfect shapes. My trees have been under expert care for years, with constant shearing they have become perfectly shaped and very dense. Trees of such quality are perfect specimens; there is nothing else that would improve the appearance of a home so promptly and so thoroughly. They are easy to plant, easy to get started, just plant the root-ball two or three inches deeper and water heavily as you fill in the soil around the root-ball.

**Pfitzer's Juniper** perus Pfitzeriana. A Dwarf Evergreen of dark green color, grows in a beautiful vase shape, the only hardy Juniper strain to produce this growth and shape. Very good. Wherever a Dwarf Evergreen is wanted, this tree will be very satisfactory. For a creeping or low spreading Juniper use the Creeping Juniper.

**Scotch Pine** Excellent pine due to its exceptionally rapid growth, its hardness, and vigorous development of stout branches.

**Austrian Pine** Second on the Scotch Pine in being a rapid grower, with stout branches, needles 4 to 5 inches long, and the tree is perfectly hardy. A most valuable pine.

**Bull Pine, Ponderosa** Also is called Western Yellow Pine. Has very long needles; the tree is well and stoutly branched, very hardy. A fine tree for wind protection, and of nice appearance.

**Juniperus, Creeping** (Waukegan). A spreading evergreen, of steel-blue cast, very pretty, limbs creeping on the ground, forming a beautiful evergreen mat. Makes an ideal ground cover, on steep soil, in rock gardens, in foreground plantings to other Evergreens, and on the cemetery lot. Where a more upright growing, but spreading Evergreen is needed, plant Juniperus Pfitzeriana.

**Small Evergreens . . . Seedlings . . . See Page 11.**

## How to Plant Evergreens . . .

Our trees are all furnished with the complete roots and root-balls, carefully dug, and sewed in burlap. Set the wrapped balls so deep that they will be covered with about 2 to 4 inches of soil; leave the burlap on the root-balls, it will rot away very quickly after planting. Apply plenty of water to settle the soil firmly all about the root-ball.

## How to Shear Evergreens . . .

All Juniperus varieties, and Arbor Vitae can be kept in any desired shape or form by shearing. Use a pair of hedge shears, and shear off just part of the new growth, so as to even up all sides. This shearing is done end of June, and is repeated in early fall, when the second growth is about complete. Do not shear Pines or Spruce, as these trees can be pruned in later years, when they get too large, cutting off some of the lowest limbs.

## JUNIPERUS SCOPALORUM

**HARDY, DROUGHT-RESISTANT**

For foundation plantings, entrances, and wherever a compact, very trim looking evergreen is desired, this is the best of all—barring none. Can be sheared to any desired form. This tree grows beautifully in any location or locality. To improve the outside appearance of a home there is nothing which would give results so immediate, so complete, and so long lasting as this Evergreen. For special low prices, see list of prices on this page. We furnish you choice specimens, the best out of a very large block.

We also have special grafted Juniperus Scopalarum, of fine bluish color, which are of great value for immediate effects in any garden spot as well as near a pool, on cemetery lots, or wherever a very choice colored well-shaped tree is needed. Never before have such perfect specimens of trees been offered at such low prices. In order to give our customers an extra value, we have selected this tree, and for several years we have concentrated much of our efforts to produce this beautiful block of stock. Ready to be transplanted now, we are pricing these trees so that everybody can enjoy them. We can ship all through March, April and May, every shipment fresh dug, direct from the field.

## Entrance Collection

### 2 JUNIPERUS SCOPALORUM, 3 ft.

Plant one on each side of your home entrance, at least 2 ft. from the walk or steps, and 2 ft. from the foundation wall.

### 4 JUNIPERUS PFITZERIANA, 18 to 24-inch spread.

Plant two on each side, 3 ft. away from the Juniperus Scopalarum, and about 3 ft. apart.

All 6 trees (with complete root-balls, packed, regular value \$15.50, for only.....

**\$12.50**

BY FREIGHT

Persian Lilac (at left) makes a dense hedge or screen.

# Frame your garden with a HEDGE

**Amur River Privet** Amongst all sheared hedges, Amur River Privet stands far out in the lead. Its extreme hardness is only one of the advantages Amur River Privet offers: a clean, healthy, shining green foliage, a dense growth that responds wonderfully to shearing are also found in this Privet. I recommend planting either in a single row 6 to 8 inches apart, or in a double row for a very broad hedge, the rows 8 to 10 inches apart, the plants in the rows 8 inches apart, and standing alternately. Right after planting cut them back to within a few inches from the ground to make the hedge bush out low. Shear twice during the summer to even up the new growth. I have well rooted plants, the best for hedges.

Postpaid:	10	25	100
12-18 inch nice plants....	\$0.80	1.75	6.50
18-24 inch strong plants..	1.15	2.60	8.50

**Golden Privet** In every respect the same as the Amur River Privet, however, the leaves in a sunny location are of a beautiful golden yellow color, highly attractive. Individual shrubs, sheared round to ball forms can also be furnished at \$1.25 each, 2 to 3 ft. size, for planting as single specimens in groups of Evergreens. For hedges:

Postpaid:	10	25	100
8-15 inch.....	\$1.00	2.20	8.00
12-18 inch strong plants..	1.60	3.50	12.50

**Russian Olive—Silver Leaf** Silvery-gray foliage and twigs, which makes a hedge of these plants very attractive. Plant 8 inches apart in the row, and shear the plants right after planting to 3 inches from the ground to make them bush out low. Will make a nice 4 ft. hedge, or for a tall screen plant 12 inches apart. Shear during the summer once or twice to even up the new growth, and cut the hedge back every spring, allowing only 4 inches of previous year's growth to remain on the hedge. My plants have strong roots, short tops, special hedge-grade. 6-12 inch and 12-18 inch. Prices, see page 11.

**Russian Mulberry** Sheared from the beginning, just like Privets, the Russian Mulberry makes a very nice hedge. For this purpose plant 6 or 8 inches apart in the row, or plant in double rows like Privet. Prices of the seedlings, healthy, well rooted stock, and well up to grades, see page 11.

Amur River Privet hedging in a tall group of pyramidal cedars.

## LOW ORNAMENTAL HEDGES

**Barberry, Thunbergi** Will make hedge up to 18 to 24 inches in height. Keeping its neat shining green foliage throughout the summer in perfect condition, changing to a showy red in fall. Densely branched, can be grown in sheared forms or without shearing in natural shape. For shearing plant 8 inches apart, for natural growth 12 inches apart in the row. Larger sizes see page 16.

12-18 inch—	
Hedging size, 10 for 60c; 25 for \$1.30; 100 for \$4.00; postpaid.	

**Spirea Thunbergi—Flowering** Makes a most attractive low hedge, not over 3 ft. in height, and of a beautiful light green color. Can be grown without shearing. The flowers are white, and appear in great profusion in early summer. 12 to 18-inch nice plants, 10 for \$1.80; 25 for \$4.25; postpaid.

## THORNY HEDGES

**Caragana, Siberian Pea Tree** Extremely hardy, makes a pretty screen, very upright in growth, blooming yellow in May. Has a pretty foliage. For enclosure of your garden, as well as for stopping the wind, this plant is very satisfactory. Prices, see page 10.

**Honey Locust** Gleditsia Triacanthos. Makes a stout, extra hardy, theft-proof hedge for field and stock enclosures. The strong thorns of Honey Locust will stop animals of any size. 18 inches apart is the right distance in the row. This Locust will never make suckers from the roots. For prices of the seedlings, see page 11.

## Osage Orange

The most popular hedge for field and stock enclosures. Best for post growing. Osage Orange is coming back; in recent years it has been proven that these hedges protect fields from hot and dry wind, and catch the snow in the winter. It improves farm ground. Use 6 to 12-inch seedlings for hedges; prices, see page 11.

## FLOWERING HEDGES and SCREENS

**Persian Lilac** Makes a most elegant tall hedge, will not make sprouts from the roots, keeps a healthy foliage throughout summer and fall, and blooms beautifully at "Lilac-Time." For a fine, dense screen-enclosure, plant Lilacs. Nice hedging size, 12-18 inch plants, 10 for \$1.65; 25 for \$3.75; 100 for \$14.00; prepaid.

**Old Fashioned Lilac** The same as above except for its leaves, which are larger, and is preferred where there is no shortage of ground space, as this Lilac sometimes makes a few sprouts from the roots. Blooms beautifully. Special price on hedging size, 12-18 inch plants, 10 for \$1.20; 25 for \$2.80; 100 for \$10.00; postpaid.

**Spirea Van Houtti** There is no other flowering hedge of this height (4 to 5 ft.) that would be so hardy, and require so little care as the Spirea Van Houtti. Blooms beautifully in June. 12 to 18-inch nice plants, 10 for \$1.00; 25 for \$2.00; 100 for \$6.50; prepaid.

**Bush Honeysuckle** Grandiflora Bush Honeysuckle makes a pretty, very dense screen 8 to 10 ft. tall. Plant them 18 to 24 inches apart in the row. Blooms pink in May, later followed by red berries. Extremely hardy, always a fine, clean shrub, healthy foliage, and an upright grower. Can be sheared to even height. 12-18 inch nice plants, 10 for \$1.80; 25 for \$4.00; postpaid.

**Chinese Elm** Due to the rapid growth of the seedlings, and their response to shearing, a quick hedge can be grown from 12 to 18-inch Chinese Elm seedlings, see page 10. Particularly for hedging on the larger lawns of farm properties. Plant 6 or 8 inches apart in the row, cut the seedlings back to 6 inches from the ground right after planting to encourage a low branch system. Shear the new growth once or twice through the summer, and cut the hedge back every spring, allowing only 4 to 6 inches of growth to remain on the hedge from one year to the next.

Beautiful hedges and formal effects from sheared Russian Mulberries on the home grounds of Mr. P. B. Cole of Cambridge, Nebraska, planting stock furnished by Sondereggers.

There Is a Hedge for Every Purpose.

# Flowering SHRUBS

## ALTHEA

### Rose of Sharon

Hardy in the North with protection of straw-mulch. Fine upright growing shrubs (6 ft.), blooming beautifully through late summer and fall.

**Althea Ardens** Large double flowers. violet colored

**Althea Jeanne d'Arc** Pure white double flowers.

**Althea Lucy** Finest red, very double flowers.

Price of all Altheas: Extra nice 2-ft. shrubs, 40c each; 3 for \$1.00; postpaid.

## Butterfly Bush

**Butterfly Bush** The finest of the improved varieties on the market. Begin to bloom in July, and continue throughout the summer and fall. Roots are perfectly hardy, making a complete new blooming size growth every year.

**Ile de France Butterfly Bush** Grows tall. The giant flower spikes of claret purple appear in great abundance, highly decorative in the garden or in bouquets. Strong, blooming size roots, 35c each; 3 for 90c; postpaid.

**Charming, Butterfly Bush** A most beautiful new variety of distinctly pink to lavender shaded blossoms. Very good. Full blooming size roots, 40c each; 2 for 70c; postpaid.

## Desmodium, Sweet Pea Shrub

A most magnificent shrub, covered with purplish pink flowers. Blooms abundantly from middle of September until frost. The height of the shrub is 3-4 ft., makes a new bush every year from the root which is hardy. Strong bushy blooming size roots, 45c each; 2 for 80c; prepaid.

# Barberries, Rust-free--Hardy

**Barberry Thunbergi** Grows to a height of 2 to 3 feet, densely branched and with a clean, healthy foliage, shining dark green throughout the summer, changing to a high tone of scarlet in the fall. Berries showy crimson, remaining on the bush through the winter, are adding to the splendid appearance of this shrub. Stands shearing well, and is often grown for globe and box shapes, also for hedges. Has small thorns along the branches. For a neat border shrub this is one of the best.

Prepaid	1	3	10	25	100
12-18 inch, nice hedging size.....	...	...	\$0.60	\$1.30	\$4.00

2-2 1/2 ft., extra bushy.....	.40	1.10	3.30	...	...

**Choke Cherry** (*Prunus Denissa*). Grows to a large size, and can be grown in bush or tree form. Blooms early in the spring in dense racemes of white flowers, a beautiful sight when in full bloom. The cherry that appears later in the season is purple black, sometimes used for canning. Hardy everywhere. 2 to 3 ft. nice shrubs, 35c each; 3 for 90c; prepaid.

**Red Leaf Barberry (Atropurpurea)** Of the same type and strain as the Barberry Thunbergi, also growing to a height of 2 to 3 ft. However, the foliage of this barberry is of a bronzy-red color throughout the entire summer, coloring up to a fiery red in the fall. In a sunny or partly sunny place the color develops best, in full shade it remains almost green. Can also be sheared to forms, in landscape work it is used very generally for color effect. My shrubs are selected for extra good color.

18-24 inch, heavy selected bushy shrubs.....	\$0.48	\$1.35	4.10	...

## Rose Tree of China

### Double Flowering Almond

**Double Pink** (*Prunus Amygdalus*). Will form a well shaped bush 4 to 5 ft. high, with erect main canes and bushy branches. In April when the double rose-shaped blossoms cover the slender branches of the bush it is truly a gorgeous sight. Hardy as far north as southern half of Nebraska and Iowa. For the North, I recommend *Prunus Triloba* in place of this almond.

**Price** of double flowering Almond. 2 to 3 ft. nice shrubs, 65c each; 3 for \$1.75; prepaid.

**Hansen's New Bush Cherry** The special hardness, pretty foliage, drought and insect resistance, and its great wealth of blossoms in early spring make this a nice shrub also for ornamental planting. Grows about 3 to 4 ft. tall. Prices see page 32.

Mr. Pieper of Rexburg, Idaho, buys considerable quantities of nursery stock for many types of landscape work. For years, Mr. Pieper has secured his trees and plants from Sonderegger, and pictures such as the one at left, received from Mr. Pieper, are really the best proof that the stock was highly successful. Good planting, good planning, and Sonderegger's upland grown stock always give good results.

Prices on all flowering shrubs include cost of postage or express charge. In order to encourage planting of flowering shrubs even where funds for planting material are limited I am also listing, wherever possible, a 12 to 18 inch grade of shrubs, nice well rooted and healthy plants that are easy to start. The 2 to 3 ft. grade is the full blooming size.

From Colorado comes this picture of a shrub-border planted with stock from Sonderegger Nurseries.

**Cornus, Dogwood** This is a large family of tall growing shrubs, planted especially for its highly colored bark which is most attractive through the winter. Erect growers, fitting best in groups or backgrounds of shrub groups. We are offering the choicest of the perfectly hardy types:

**Golden Twig Cornus** Grows to a height of 8 and 10 feet, branches and bark of golden yellow color, very attractive through the winter. 2 to 3 ft. extra strong shrubs, 45c each; 3 for \$1.20; postpaid.

**Cornus Siberica** Also called the Coral Dogwood due to the shiny red color of bark and twigs. Grows to a height of 8 or 10 ft., blooms in clusters of white blossoms through early spring. Hardy everywhere. 2 to 3 ft. nice shrubs, 40c each; 3 for \$1.00; postpaid.

**Buffalo Berry** *Shepherdia*. A native shrub from the North, growing to a nice shape, about 5 to 6 ft. tall, and bearing large numbers of red berries, attracting birds and also used for canning and medical purposes. 30c each; 3 for 75c; prepaid.

## Golden Bell---Forsythia

**Forsythia Fortuni** 6 ft. tall. One of the finest early spring flowers, the brilliant golden yellow blossoms appearing before the leaves develop, and literally covering the branches. Very showy, foliage dark green, grows erect, and the shrub is hardy everywhere. 12 to 18-inch plants, 25c each; 3 for 65c. 2 to 3-ft. well branched shrubs, 45c each; 3 for \$1.10. Prepaid.

**Weeping Forsythia** (*Suspensa*). 5 ft. tall. In freedom of bloom, time of blooming, and in the pretty shape and color of the flowers much like the above variety, differing only in the habit of growth. The Weeping Forsythia arches over very gracefully, very attractive. 12 to 18-inch plants, 30c each; 3 for 80c. 2 to 3-ft. nice shrubs, 50c each; 3 for \$1.35; prepaid.

**Golden Elder** (*Sambucus Canadensis aurea*). Makes a large shrub 8 to 10 ft. tall, and branching out well to a pyramidal shape. The large leaves, all or partly golden yellow contrast well in groups of tall shrub plantings. The leaves color up to best advantage in full sun. Blooms in July, large white blossom clusters, followed by black berries which attract birds. Perfectly hardy. 2-3 ft. selected shrubs, 55c each; 3 for \$1.45; prepaid.

**Beauty Bush** (*Kolkwiza Amabilis*). Grows to a height of 4 to 5 ft. Its blooming time is from May to June, during that time the pink trumpet-shaped flowers with orange veins in the throat clustered densely along the arching branches are a splendid display of color, shape and graceful setting. This shrub should be planted more freely. It is hardy except in the North where it should have a mulch of straw or leaves through the winter. Nice 18 to 24-inch shrubs, 75c each; prepaid.

## Caragana, Siberian Pea

**Tree** Wherever your planting plans call for a tall, very erect growing shrub with a pretty, clean foliage, the Caragana will please you. Extremely hardy, this shrub grows to a height of 8 to 10 ft. and can be sheared for height. Its foliage is of a feathery appearance, attractive, an abundance of golden yellow pea-shaped blossoms appear in May. It is also popular for tall hedges and screens; for this purpose plant from 12 to 18 inches apart in the row. Branches slightly thorny add protection to good appearance. For small plants, hedging and windbreak size see page 10. Nice 2 to 3 ft. shrubs, 35c each; 3 to 4 ft. size, extra heavy, 55c each; prepaid.

## Smoke Tree—Fringe Tree.

**Purple** *Rhus Cotinus*. Grows 10 to 12 ft. tall. The blossoms of this bush look like puffs of smoke, and they are formed of large, loose panicles bearing extremely small purple flowers. The entire blossom becomes profusely plumose, attaining their attractive smoky appearance. Blooms through the entire summer. Entirely hardy, a strong grower, branching out nicely to a large vase shape. This most interesting shrub, with a clean, shiny foliage makes a beautiful showing as a single specimen on a lawn or in groups of tall shrubs. 18-24 inch selected shrubs, 80c each, prepaid.

**Highbush Cranberry** (*Viburnum Opulus*). Grows 8 to 10 ft. tall, a magnificent shrub of upright growth and spreading top. Blooms in May, large flat clusters of single white blossoms, followed later by ornamental berries (not edible). A very hardy shrub, used quite frequently in the tall groups of shrubs in parks. 18-24 inch strong shrubs, 50c each, prepaid.

**Hardy Holly** *Winterberry*. The hardest of the Ilex family, and successful in the Middle West and East. Showy red berries for winter-decoration. Shrub eventually reaches a height of 8 to 10 ft. Use plenty of Oak-leaf mold, to which Cottonseed-meal and waste-tobacco may be added, also apply plenty of water. In this soil combination the shrub does extra well. Use no commercial fertilizer, not much care required after planting, this shrub wants to be left alone. 18-24 inch nice shrubs, 50c each, postpaid.

## Bush Honeysuckles (Lonicera)

Of this large family of shrubs we have selected after many years of testing, the following 4 varieties, which in our opinion are not only the hardest, but in their respective sizes are the most freely blooming. These shrubs will bloom in April and May, followed later by red berries which attract birds. Wherever upright growing shrubs with good, healthy foliage are needed, these Bush Honeysuckles deserve special attention. For Climbing Honeysuckles see page 1.

## Honeysuckle Grandiflora

**Rosea** 10 to 12 ft. tall, perfectly hardy, does well most anywhere, a profuse bloomer, blossoms bright pink, followed by showy red berries.

## Pink Tartarian Honeysuckle

8 to 10 ft. tall, very dense grower, stands shining well, and is perfectly hardy. Blossoms in May and June, showy pink.

## Red Tartarian Honeysuckle

8 to 10 ft. tall, of the dense growing Tartarian type, with very dark red blossoms, in fact the best red Honeysuckle. Hardy.

## Morrowi Honeysuckle

4 to 6 ft. tall, this is the Japanese variety with the lower and more spreading growth. Blossoms pure white in May and June, rich crimson berries later in the season. In strong demand for landscape work for dense growth, and good foliage. Easy to grow, and perfectly hardy.

Prices on all Honeysuckles, prepaid:

	1	3	10
12 to 18-inch nice plants	\$.025	\$0.60	\$1.75
2 to 3 ft. selected shrubs	.45	1.20	3.60

## Artemesia, Silver King

This is a perennial growing to a dense bush form about 2 ft. high, and can be kept lower by shearing. The silvery white twigs and foliage, compact growth, and extreme hardness place this plant amongst the most attractive for color effect. Can also be planted in hedge style 12 inches apart in the row. Reaches full size in one season. 25c each; 3 for 50c; 10 for \$1.50; prepaid.

## Wintercreeper

A beautiful evergreen plant, growing into a dense mat for a permanent ground cover. Under large trees, on steep banks or to cover a lot in the cemetery, there is hardly another plant which would give such complete year-round satisfaction. Branches spreading out on the ground take roots freely. Leaves very pretty, resembling the foliage of laurel, and remaining green through the winter. Wherever you need a clean, good looking ground cover of long life, let Wintercreeper do the work. Extra nice strong plants, 2 year No. 1, each 50c; 3 for \$1.20; postpaid.

Photo at left: Hydrangea paniculata Grandiflora blooms over a long period through summer and fall. In this picture is shown a tall shrub planting with a border foreground of Hydrangea P. G. Hydrangeas are at their best in shade or part shade. They combine beautifully with Spirea Anthony Waterer (see page 31) which blooms at the same season of the year, and being somewhat shorter in growth this red-flowering Spirea as a foreground edge of a Hydrangea group touches the setting up to perfection. Watering of Hydrangeas through dry seasons should never be neglected.

## Hardy Bush---Hydrangeas

### Hydrangea paniculata

Grandiflora, commonly called P. G. Hydrangea. Grows 4 to 5 ft. tall, and produces a wealth of immense heart-shaped flowers. When the blossoms first open in August they are white, turning to a pink and bronze color later, and remain on the bush throughout the late summer in that color. Very hardy, and a sure bloomer.

Both varieties, prepaid:	1	3	10
12-18 inch nice plants.....	\$0.35	\$0.90	\$2.65
2-3 ft. selected choice shrubs, blooming size.....	.55	1.50	4.60

### Hydrangea, American Everblooming

Also known as Snowball Hydrangea, Hills of Snow, and H. arborescens. Grows to a height of 5 ft. Flowers of dazzling white begin to appear in June, and under normal conditions this Hydrangea will bloom repeatedly during the summer and early fall. Hardy, responds extra well to frequent watering through dry seasons.

## Extra Choice Lilacs Hardy Healthy

The finest of all fragrant flowers of early spring. Vigorous growth, a clean, healthy foliage plus an unlimited blooming ability are yours in Sonderegger's better Lilacs.

**Old Time Lilac, Purple** (Syringa vulgaris.) Grows to a beautiful shrub, dense, well shaped, height 10 to 12 ft. with shiny, leathery leaves, and a most beautiful blooming season. Highly fragrant flowers, true lilac purple. Used for single shrubs, in groups, and for hedges, screens and even windbreaks.

**WHITE.** This is the old time Lilac with the pure white flowers, in all other respects the same as the purple strain.

Prices of Old Time Lilacs, Prepaid:	1	3	10	25
12-18 inch.....	\$0.20	\$0.50	\$1.40	\$2.50
18-24 inch.....	.25	.65	1.80	3.75
2-3 feet.....	.35	.90	2.80	5.85
3-4 feet.....	.50	1.35	4.00	...

**Persian Lilac** Syringa rothomagensis. Sometimes called Chinese and Rouen Lilac. Grows to a height of 10 to 12 ft. and blooms in April and May. Blossoms purple, blooms well, and the special advantage of this lilac is that it does not make sprouts away from the bush. Therefore, it is preferred for hedges around gardens and lawns where the occasional sprouts of the Old Time Lilac are sometimes objectionable. Stands shearing well.

Persian Lilac, Prepaid:	1	3	10	25
12-18 inch.....	\$0.25	\$0.60	\$1.80	\$4.00
18-24 inch.....	.30	.75	2.30	5.00

### French (Budded) Lilacs

12 to 18 inch nice shrubs, 55c each; 3 for \$1.45; prepaid.

<b>Abel Carrier.</b> Double, light lavender.	<b>Othello.</b> Large flowers, single purple with red.
<b>Charles X.</b> Deep reddish purple.	<b>Philemon.</b> Double, pretty deep violet.
<b>Marie Le Gray.</b> Single, finest pure white.	<b>President Grevy.</b> Double, light blue.
<b>Souvenir de L. Spaeth.</b> Purple-red, single, extremely showy.	<b>Madame Lemoine.</b> Double white.

Blossoms of the Old Time Lilac, a shrub of great beauty throughout the year, but particularly through its blooming season, end of April and through May. For fragrance these flowers rank with the best.

**Tamarix Hispanica** A most graceful and continuous blooming shrub, reaching a height of 12 to 15 ft. unless kept in a lower, dense bush form by shearing the branches every few years. Begins to bloom in June, and continues through the greater part of the summer. Blossoms of carmine pink color, in beautiful sprays. This shrub does not make leaves, its foliage consists of small green buds all along its slender branches, the blossoms appear in the very same fashion. Tamarix are not affected by saline or alkaline soil, they succeed even in the very spray of salt water at seaside plantings. Fully hardy. 12 to 18-inch nice shrubs, 25c each; 3 for 65c; 10 for \$2.00. 2 to 3 ft. selected shrubs, very nice, 45c each; 3 for \$1.20, prepaid.

## Flowering Quince—Firebush

See colored photo, front cover page. Cydonia. Very early in the spring, before the leaves appear, this shrub produces a wealth of deep flame red flowers. They are cup-shaped, arranged beautifully all along the wood and branches. Grows to a height of 4 to 5 feet and spreads out nicely. Very hardy, does well anywhere. Should be in every shrub planting.

Prepaid:	1	3	10
12-18 inch .....	\$0.25	\$0.60	\$1.75
18-24 inch .....	.30	.75	2.20
2-3 feet .....	.35	.90	2.75

**Snowball** This is the old fashioned variety, which is perfectly hardy, developing into a large shrub 10 to 12 ft. in height, and blooming most profusely. Of all the later introductions of Snowballs, none has ever come up to this strain in either hardness, freedom of bloom, or perfect shape of blossoms. It prefers a moist and shady, or partly shaded place. As a single specimen on the lawn, as well as in the background of shrub groups, or against the wall, this is one of the most loved and admired shrubs. 12 to 18-inch nice young shrubs, 40c each; 3 for \$1.10. 2 to 3 ft. selected extra heavy shrubs, 70c each; 3 for \$1.90, prepaid.

This photo was received from Mrs. Ben Pauls, West Frankfort, Ill., with her beautiful Snowball, the old fashioned variety, furnished some years ago by Sonderegger.

MOCK ORANGE VIRGINALIS

**Mock Orange Virginalis** Reaches a height of 5 to 6 feet and its first flowers appearing in May range from semi-double to double. In normal years this shrub blooms again in late summer, at that time the blossoms are single. Of compact but erect growth, very valuable. Blossoms are white, in clusters, and are fragrant. 12 to 18-inch nice plants, 32c each; 3 for 85c. 18 to 24-inch selected heavy shrubs, 60c each; 3 for \$1.60, prepaid.

**Mock Orange, Dianthaflora** One of the most freely blooming of the Philadelphia family, grows 6 feet tall, spreading out to a pretty bush shape. Blossoms profusely in May, blossoms of an ivory color, with blossom petals fringed, very fragrant. A very hardy, sure blooming shrub for most any purpose. Strong, well rooted shrubs, 18 to 24-inch size, 30c each; 3 for 75c. 2-3 ft., extra select, 45c each; 3 for \$1.10, prepaid.

**Mock Orange Lemoine** Grows 4 to 5 feet tall. This is one of the older types, it has always been hardy, and a remarkably free bloomer. Blossoms of medium size, sometimes semi-double and very fragrant, appearing in May and June. Does well anywhere. 2 to 3 ft. very nice selected shrubs, 40c each; 3 for \$1.00, prepaid.

## Proper Care of Shrubs

Plant early, prepare holes deep and wide enough to allow plenty of room for these well rooted shrubs. Use only top soil to fill in around roots (we do not advise mixing fertilizer with the soil at planting time.) Water well to settle the soil. Cut back some of the branches after planting, to give the shrub an even shape. Most of the 2 to 3 ft. sizes will bloom the second year, often the first year. This size is specially selected for quick results.

## WEIGELA

For shade and semi-shade—  
Hardest varieties.

**Weigela Rosea** Grows to a height of 5 feet, with its gracefully arching branches covering a diameter of 4 to 5 feet. Blossoms rose pink, appearing on each branch in almost artistic bouquet form during June, and usually again late in the summer. A fine shrub for the garden, and cut flowers.

Prepaid:	1	3	10
12-18 inch .....	\$0.25	\$0.60	\$1.75
2-3 feet .....	.45	1.20	3.50

**Weigela Eva Rathke** Much like the Rosea, except that the blossoms of slim trumpet shapes are of showy crimson color, and usually has two blooming periods, June and late summer. Very pretty, should be in every garden. Weigelas in bloom are a beautiful sight, and are equally valuable for bouquets.

Prepaid:	1	3	10
12-18 inch .....	\$0.35	\$0.90	\$2.75
2-3 feet .....	.60	1.65	....

## SNOWBERRY and CORALBERRY

**Red Waxberry** Also called Corallberry (symphoricarpos vulgaris). This is the native "Indianberry," known for its red berries which it retains through the winter. A neat shrub, with clean healthy foliage, blooming pink in July, followed by red berries. Prefers a shaded place, does well even under old trees, and is perfectly hardy everywhere, requiring little care. Grows about 3 feet tall.

Prepaid:	1	3	10	25
18-24 inch .....	\$0.25	\$0.65	\$1.80	\$4.00
2-3 feet .....	.30	.80	2.25	5.00

**White Waxberry** Also known as Snowberry (symphoricarpos racemosus). Grows 3 to 5 feet tall, a native shrub of the Mid-west, and extremely hardy, grows to a pretty bush shape without pruning, and prefers a slightly shaded spot. Very attractive throughout the year. In June the pink blossoms, through the summer a lustrous clean foliage, in fall and winter the white berries remaining on the bush.

## Fern-Leaf Sumac

Staghorn. Note photo above. A magnificent shrub throughout the year. Reaches a height of 8 feet, perfectly hardy. Beautiful foliage, always free from insects or disease, and coloring to a most attractive crimson color in the fall. At that time it is truly a grand sight. Nice 2 to 3 ft. shrubs, 58c each; 3 for \$1.55, prepaid.

Order Early—We Ship at the Right Planting Time.

**SPIREA BILLARDI**

A fine flowering shrub in mid-summer.

# Spirea Billardi

Flowers in the shrub planting would be very scarce in mid-summer, particularly in August, if we did not have the Spirea Billardi which blooms profusely at that time. I can supply guaranteed, true-to-color, the white and pink varieties.

**White Billardi** Grows to a height of about 5 feet, canes erect, arching over very nicely on top to an even, well balanced bush form. The large fluffy blossom spikes appear through the greater part of the summer, with a full blooming period in August. A clean, healthy grower which is hardy anywhere, and of simplest culture.

**Pink Billardi** For informal hedges, and wherever you need a medium sized flowering shrub you will find the Billardi Spirea satisfactory. Dense flower spikes of warm pink color, appearing in great abundance from middle of July all through August, this shrub will be a valuable addition to your planting. Very hardy, requires practically no care.

## Dwarf Spireas

### Spirea Anthony Waterer

Grows to a height of 2 to 3 feet, upright in growth, and in bloom almost throughout the entire summer with showy crimson flowers, arranged in flat umbels. It is practically ever-blooming, and hardy most anywhere except in the extreme North where it should have a mulch of straw or leaves over winter. Prefers a snady or partly shaded place.

12-18 inch shrubs.....	.30	.75	2.20
18-24 inch heavy.....	.55	1.50	...

### Spirea Thunbergi

Reaches a height of slightly over 3 ft. Stands shearing well, and is recommended for low ornamental hedges. Of outstanding beauty is the foliage of this Spirea, narrow, willow-shaped and very light green; the dense branch system which gives the shrub a massive appearance. Blooms white in early summer. Hardy as far north as Nebraska, the Great Lakes region, and the East.

18-24 inch.....	.30	.75	2.20
2-3 ft.....	.40	1.00	3.00

### Spirea Salicifolia

The willow-leaved Spirea. A very pretty shrub which should be planted more generally. Its willow-shaped foliage in itself is very attractive, and in July when the pink blossoms appear in well arranged panicles it is one of the prettiest flowers of the month. Grows fairly erect to a height of about 5 feet. Hardy, will do well in any location.

Prepaid:	1	3	10
12-18 inch nice plants....\$ ..	.45	1.30	
2-3 ft. bushy shrubs.....	.35	.90	2.70

## Spirea Arguta Multiflora

### Snow Garland

The earliest of the Spirea to bloom, usually about two weeks before the Common Bridal Wreath. Flowers snow-white, covering the entire shrub from top to ground level, with every branch a snowy mass of blossoms. The nice feathery foliage of the shrub remains decorative throughout the summer. The shrub grows about 4 ft. tall, spreading very evenly.

Prepaid:	1	3	10

18-24 inch shrubs.....	.28	.70	2.00
2-3 ft. bushy shrubs.....	.35	.95	2.90

## Spirea Van Houtti ... Bridal Wreath

There is no other shrub which enjoys so much popular favor as the Bridal Wreath, its height of 5 to 6 ft. that can be kept by shearing fits in just perfectly on most places. For hedges, foundation planting, background to smaller shrubs or flowers, as well as for single specimens few other shrubs fit in so well as this Spirea. May and June is the flowering time of the Spirea Van Houtti. Like huge snowdrifts, the branches of the shrub arching as if under the weight of the blossoms with which they are completely covered, this is the Bridal Wreath at blooming time. Perfect hardiness, healthy growth, easiest of culture make up the rest of desirable qualities all found in this shrub.

## MIXED IRIS

Unnamed. All Colors and Shades.  
12 for 60c; 25c for \$1.10; Postpaid.

## IRIS Hardy Easy To Grow

PRICES: All Varieties

12c each; 3 for 30c; 10 for 80c;  
25 for \$1.70; postpaid.

**Blue Bird.** 24 inches. Standards light blue, falls rich dark blue. Blooms very freely.

**Blue intermediate.** 16 inches. Dark blue. **Perfection.** 24 inches. Standards light blue, falls dark velvety violet-black with orange beard.

**Plicata.** Dark purple with lilac falls. 20 inches. Blooms early.

**Satch.** 30 inches. Large flowers, standards fine shade of violet, very dark blue falls.

**California.** 24 inches. Very dark reddish purple Iris.

**Kochii.** 24 inches. Glowing claret purple.

**Siberian Blue.** 22 inches. Small blossoms, pretty shape, deep blue, very early; fine for border.

## Two-Tone Iris

**Frederick.** 28 inches. Pale lavender with light blue falls. Blooms well.

**Madame Chereau.** 24 inches. With blue fringe on standards and falls. Sure bloomer.

**Nibelungen.** 30 inches. Standards old gold, falls dark wine-red. Extra good.

**Rhein Nixe.** 26 inches. Ivory white standards, falls lovely mauve with white edge. Blooms late.

**Madame Louise Victoria.** 24 inches. Light lemon standards with pretty purple veins, falls dark purple with gold edge.

## Caladium, Elephant's Ear

A beautiful foliage plant which is grown from a bulb to full size in one season. Large leaves of tropical appearance. Ideal for planting as a tall border, near a pool or in groups on a lawn bed. Bulbs are taken up in the fall and stored in the cellar like Gladiolas. Will add a fine touch to your garden. Plant 4 inches deep, water freely. 25c per bulb; 3 for 60c; postpaid.

**Mexican Tuberose** Extremely fragrant. Grows 16 inches tall with long spikes of waxy-white blossoms well arranged. Showy in the garden or in the vase. Stands heat and drought very well. Blooms in September. Plant 4 inches deep, and take the bulbs up for the winter. My bulbs are sure to bloom. 3 for 25c; 5 for 40c; 12 for 75c; postpaid.

## PLANTING INSTRUCTIONS

For Lilies proper depth given within descriptions. Plant in shady or partly shaded places. Use a small amount of sand with each bulb, placing the sand around the bulbs. For Iris I recommend shallow planting, covering the bulbs about 1½ inches with soil. All ordinary garden soil will produce good results with Iris and Lilies.

Lilies, Iris, Peonies, Phlox, can also be furnished in September.

## Sonderegger's Fancy Mixed Gladiolas

Containing only choice varieties, bulbs of full blooming size, all strictly large flowering types, carefully mixed to give you many different colors. 12 bulbs, 30c; 25 bulbs, 50c; 100 bulbs, \$1.70; postpaid.

## GUARANTEE and PLANTING INSTRUCTIONS

Sonderegger's Gladiolas are guaranteed to be true to name, and to bloom if planted as follows: Dig the ground up deeply, plant 4 to 6 inches deep, in heavy soil not quite so deep, 6 inches apart. Plant in full sun, or partial shade. For extra large spikes a top dressing of Vigoro fertilizer will help. Keep the bed free from weeds, sprinkle frequently through dry weather. Take bulbs up in the fall.

**My Full-Size Bulbs Will Bloom Without Fail.**

# Hardy Asters

## THE LATEST PRIZE WINNERS

**Frikarti.** Lavender blue, blooms all summer and fall, extra large blossoms, over 2 inches across, beautiful cut-flower. Each, 49c, postpaid.

**Autumn Glow.** Glowing crimson, very showy, and also a dainty cut-flower. Each, 25c, postpaid.

## DWARF or CUSHION CHRYSANTHEMUMS

**Pink Cushion.** Blooms all summer, until frost, in beautiful shades of pink, orchid, and golden centers. Each, 25c, postpaid.

**Red Cushion.** Pure fiery-red, blooms over a long period. A beautiful plant. Do not miss it. Each, 35c, postpaid.

**Yellow Cushion.** Pure golden yellow, very brilliant, forming an even, compact cushion, often measuring 2 ft. across. Each, 35c, postpaid.

Hardy Perennials are the backbone of every flower garden. They remain for years, increasing in beauty; there are all colors to be had, and by selecting a wide variety you can have a colorful flower garden from early spring when the Poppies bloom, until even after frost, when hardy Asters and Chrysanthemums close the year's flower-season with a most gorgeous display of massed color.

**Phalaris, Ribbon Grass** Very hardy, and with its broad leaves striped green and ivory, a showy plant in the flower bed, or wherever a good foliage plant is wanted. Grows 1 to 2 ft. tall. Each 20c, postpaid.

**Baby's Breath** The New Bristol Fairy Grafted plants, beautiful flower. The blossoms are large, pure white, double, and appear in large sprays. Blooms continually all through the summer. Height 2 ft. Each 50c, postpaid.

**Bleeding Heart** The old-fashioned type with the delicate heart-shaped blossoms along gracefully arching branches. Blooms in May and June, this flower should be in every flower garden. Each 50c, postpaid.

**King Edward Violet** Everblooming. Everybody loves the blue, fragrant Violet, and the nice appearance of the plant with its shiny heart-shaped leaves, forming well-shaped little globes. And this Violet not only blooms in the spring, it continues through the greater part of the summer, and even in late fall there are still more flowers to pick. For a border plant, in the rock garden, or wherever a nice small plant is desired, this Violet will please you. Each 25c; 3 for 50c; 10 for \$1.40; postpaid.

**Golden Glow, Rudebeckia** Grows 6 ft. tall, and through July and August produces large masses of golden globe-shaped blossoms, resembling in size and form a Snowball. Each 25c; 3 for 60c; postpaid.

**Gaillardia, Blanket Flower** Here is one of the most continually blooming plants for your flower garden, showy in the beds as well as in bouquets. Highly colored, easy to grow, sure to bloom. We can furnish you the varieties Dazzler, large golden yellow and maroon, Goblin, golden yellow and red, and Portola Hybrids, bronzy red. Your choice, each 25c; 3 for 60c; 10 for \$1.65; postpaid.

## COLUMBINES

**Crimson Star.** New, very large flowering, blossoms extra well. May and June, grows 24 inches tall. Each, 35c, postpaid.

**Dobbies Imperial Hybrids.** The finest assortment of choice colors. Sure and freely flowering. Each, 25c, postpaid.

## DELPHINIUMS

**Black Knight.** The darkest of them all. Individual flowers 2½ inches in diameter, beautifully shaped, giant spikes. The finest Delphinium ever known. Each, 49c, postpaid.

**Gold Medal Hybrids.** Tall spikes, well filled with double and semi-double blossoms ranging from purplish blue to white. Each, 29c, postpaid.

## BLUE FLAX

This is the Linum Narbonense hardy Flax, with bluish green feathery foliage, almost fern-like, and dainty little blue flowers. For border work or between cut-flowers in the perennial bed, very pretty. Each, 22c, postpaid.

## HARDY FERNS

**Goldie's Wood Fern.** Fronds grow 2 ft. tall, almost evergreen. Likes shade and good drainage of the soil. Each, 28c, postpaid.

**Ostrich Fern.** Very graceful with finely cut pinules, 2 to 3 ft. tall. Each, 28c, postpaid.

## Ornamental Grass

**Hardy Pampas.** Note picture at right. A tall growing variety with large showy plumes, often reaching a height of 8 ft. Each, 25c, postpaid.

**Eulalia Gracillima.** Grows 6 ft. tall, with narrow, shiny green leaves, arching over very gracefully, and silvery plumes in late summer and fall. Each, 25c, postpaid.

- 2 Baby's Breath, Bristol Fairy

All selected plants for **\$2.95** POST PAID

**Free:** One 25c U. S. Defense Saving Stamp with this Collection.

# PERENNIALS

## SELECTED GARDEN FLOWERS

### Hardy Phlox

*Finest Colors  
Sure to Bloom*

**Crimson King** 18 inches tall. Excellent deep crimson, well shaped, showy in the garden, and very valuable for bouquets. In our own gardens there is hardly another plant which blooms so continually as this Carnation, beginning in the spring and ending with heavy frost in late fall. Each, 45c, postpaid.

**Platycodon, Balloon Flower** 12 to 18 inches high, blooms throughout the summer and fall, nice bell-shaped flowers in blue and white. Similar to Campanula. Bell flower, but much hardier, free from disease and insects. Each, 25c; 3 for 60c; postpaid.

**Pentstemon** The hardy strain, which produces a wealth of flowers in several shades of red from June until late fall, resembling in shape the Foxglove. Pentstemon will remain in your garden for many years, furnishing you excellent cut-flowers. Grows 12 to 18 inches tall; very suitable for flower beds, borders and rock gardens. Each, 45c, postpaid.

**Oriental Poppy** The scarlet crimson type with black spots at base of the flower petals. The best for Memorial Day decoration. Although most Oriental Poppies are transplanted in the fall, some of our customers wish to plant them in the spring. We can furnish nice plants at either time. Each, 22c; 3 for 50c; postpaid.

**Forget-Me-Not** Lovely flower, known to most everyone. Blue, of creeping habit. This is the Alpine strain growing about 8 inches tall and blooming through the greater part of the summer. Each, 25c; 3 for 60c; postpaid.

**Mallow Marvel** Giant flowering. An improved strain, blooming abundantly through August and September, and forming nice bushes 4 to 5 ft. tall. Your choice of color—pink, red or white. Each, 28c; 3 for 70c; postpaid.

**Pyrethrum, Double Flowering** A splendid garden mixture of pink, red and white, blooming beautifully through May and June. This is a new type, especially attractive in bouquets. Each, 35c, postpaid.

**Border Gem** A beautiful deep purple Phlox. A flower of nice size and pretty shape. Does not fade. Each, 29c, postpaid.

**Caroline Van de Berg** Large flowers of very striking blue. The best "blue" to date. A lovely flower, combining with its rare color large size of the individual flower and trusses. Each, 35c, postpaid.

**Daily Sketch** Blooms in large trusses of lustrous pink with crimson-rose eye. The individual florets are the largest yet found in any Phlox. They do not fade, and bloom over a long period through summer and fall. Each, 35c, postpaid.

**Harvest Fire** Salmon-orange. A vigorous grower and free bloomer. The best in this color. Each, 45c, postpaid.

**Mount Hood** Pure white. Always sure to bloom. A flower of great charm. Each, 35c, postpaid.

**Flash** Deep red. A healthy grower, producing its showy flower heads in great abundance. Each, 35c, postpaid.

## BEANS

### 10 Outstanding Varieties

The following ten varieties are the heaviest producing on the market. Plant them in rows, 12 to 15 inches apart. 1½ lb. of beans will be needed for a 100-ft. row. Pole beans may be planted against garden fence for support.

#### Green Podded

**E120. Sonderegger's Giant Stringless Green Pod** (54 da.). One of the heaviest bearers. Pods long, round, dark green, stringless and of finest quality.

**E126. Burpee's Stringless.** Plants large, erect, very productive. Pods 6 in. long, round, stringless. Of excellent quality.

**E134. New Tendergreen** (54 da.). One of the best green podded beans for the Middle West. Pods of dark green color, round, fleshy. Good bearer, excellent for canning.

**E122. Fordhook Favorite.** Medium dark green pods, fleshy and tender, 5½ to 6 inches long and of fine flavor. Seeds pure white and if allowed to ripen are useful for soups or baking.

#### Pole Beans

**E162. Kentucky Wonder** (65 da.). I find them to be the best of all pole beans. Pods long dark green and of excellent quality.

#### Yellow Pods (Wax)

**E142. Brittle Wax.** Plants vigorous, very productive. Pods medium round, extremely brittle, fleshy, stringless, free from fiber.

**E155. Pencil Pod Black Wax** (52 da.). Plants large, stocky, good producer. Pods golden yellow, fleshy, tender and stringless. Finest quality.

**E144. Golden Wax** (55 da.). An old standard variety. Plants bushy, very prolific. Pods 5 in. long, round, bright yellow, brittle and free from strings.

**E140. Sonderegger's Improved Black Wax** (51 da.). This is one of the best all around wax beans. Pods round, 6 in. long, bright yellow, stringless.

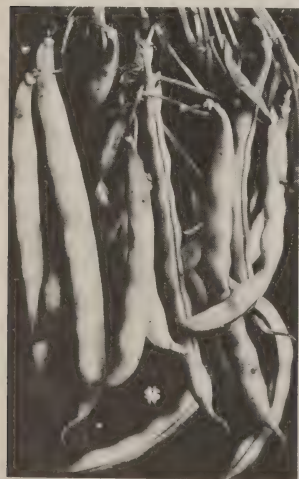

#### Lima Beans

**E154. Henderson's Bush Lima.** I have tried out all varieties of lima beans and for the Middle West I have found none better.

#### Peas

**E494. Extra Early May** (50 da.). Plants 18 in. high, pods filled with 6 to 8 medium sized peas. Good bearer and excellent for canning.

**E488. Alaska** (45 da.). The earliest of all peas. A splendid bearer. Pods 2½ in. long, well filled with 5 to 7 peas. Good canning variety.

**E490. Little Marvel** (55 da.). A very dwarf sort, grows 15 in. high. Can be planted very early. Long pods with 5 to 7 peas of excellent quality.

**E498. American Wonder** (52 da.). The earliest wrinkled variety. Grows 15 in. high, needs no brush. Pods well filled with large peas.

**E506. Peter Pan.** Best all around variety for the Middle West. Grows 18 in. high. Pods very large, filled with 6 to 8 very large sweet peas.

**E512. Everbearing** (60 da.). An excellent second early sort. Grows 20 in. high. Pods filled with large delicious peas, excellent for canning.

**E518. Dwarf Gray Sugar.** The best of all sugar peas. Very sweet, excellent quality. Pods medium size. Must be staked.

PETER PAN

Nitragin should be used on all Beans and Peas. It produces better and stronger growth, also larger crops. Many of my customers would not plant beans or peas without Nitragin. One packet enough for four pounds Beans, Peas or Sweet Peas. Price 10c per packet.

#### Sugar Beets

**E202. Klein Wanzleben Sugar Beet.** A standard variety used in making sugar and syrup. Also for stock and poultry feed. Oz., 12c; ¼ lb., 40c.

#### Mangel Beets

**E198. Giant Half Sugar Mangel Beet.** Extra sweet and large, of special high feed value for poultry and dairy use. On heavy soil I prefer this variety, as it grows shallow and is easy to harvest. Oz., 12c; ¼ lb., 40c.

### Free! . . . Free! . . . Free!

With every order for seeds in packets amounting to \$1.25 or more, you receive free, 12 Gladiola bulbs, including all colors. Fine, blooming size bulbs. (A 30c value.)

# BEETS

## "BIG THREE" BEET COLLECTION

Sonderegger's Early Blood Turnip  
Ohio Canner Crosby's Egyptian  
3 excellent sorts, **25c** POST PAID  
one pkt. of each

E179. Ohio Canner (65 da.). This new beet has a deep blood-red color, is tender, sweet and free from stringiness. Round and of uniform size.

E178. Sonderegger's Early Blood Turnip. One of the best for the Middle West. Round medium size, dark red color without light rings. Sweet and tender.

E201. Detroit Dark Red (60 da.). Round, dark red, sweet and of excellent quality; does not lose color in cooking.

E180. Crosby's Egyptian. Roots are flattened in shape, of medium size, dark red, smooth and tender.

E184. Early Blood Turnip. An old variety but still in good demand. An excellent canning sort.

E192. Swiss Chard. Grown for leaves only, which are used as spinach. Produces immense quantities of light green leaves from spring until late fall. Pkt., 10c; oz., 30c.

### Cauliflower

E246. Sonderegger's Improved Earliest Dwarf. Heads uniform in size, of fine quality. I find this to be the best of all varieties for the Middle West. Pkt., 20c; ¼ oz., 75c.

### Spinach

E591. King of Denmark. It has large spreading plants that have broad, crumpled dark green leaves. Pkt., 10c; oz., 20c; ¼ lb., 40c.

E594. Long Standing. The leaves are thick, round and of dark green color. Does not go to seed until late in season. Pkt., 5c; oz., 15c.

E596. New Zealand. Enjoy fresh, tender greens all summer. The more you cut the more it grows. Pkt., 10c; oz., 20c; ¼ lb., 60c.

### Parsnip

E480. Improved Guernsey (85 da.). Roots thick, of medium length, quality of this Parsnip is excellent, roots smooth, and fine grained. Very satisfactory for home use or market. Pkt., 10c; oz., 15c; ¼ lb., 30c.

### Salsify

E586. Oyster Plant. Makes a most delicious vegetable dish. May remain outdoors over winter. Culture same as carrots. For winter use store in sand in cellar. Pkt., 8c; oz., 15c.

## CABBAGE

E224. Early Jersey Wakefield (65 da.). This is our earliest and best pointed head cabbage. The heads are cone-shaped, very solid and tender. Weight 3 to 4 lbs. Pkt., 10c; oz., 25c.

E223. Golden Acre (65 da.). This is the very best early round head cabbage. Very fine grained, sweet and juicy, solid heads 3 to 4 lbs. Pkt., 10c; ½ oz., 25c; oz., 45c.

E236. Sonderegger's Improved Danish Ballhead (100 da.). An excellent variety for late fall and winter use. Heads large, round, fine grained, sweet and juicy. Pkt., 10c; oz., 40c.

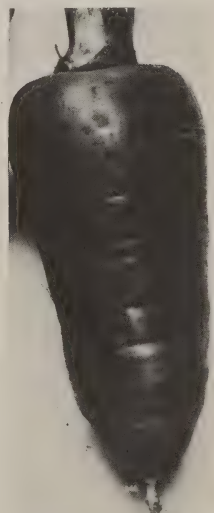

E226. Copenhagen Market. Heads round, solid, of excellent quality. Medium early. Fine for sauerkraut. Pkt., 10c; oz., 40c.

E238. Premium Late Flat Dutch. This is the largest and best of the flat head varieties. Best for late fall and winter use; good keeper; of excellent quality. Pkt., 10c; oz., 30c.

E240. Savoy, King of Earliest. Best of all sorts Savoy cabbage. Heads medium size, very solid and of excellent quality. Pkt., 10c; oz., 35c.

E244. Mammoth Red Rock. The finest, surest heading sort of red cabbage, of extra fine quality. Pkt., 10c; oz., 40c.

E222. Chinese Celery Cabbage. Makes oblong solid heads, of excellent quality. Plant seed early July. Pkt., 10c; oz., 50c.

SONDEREGGER IMP. HALF LONG

Make Your Garden a Gold-Mine for Economy and Health

# CUCUMBERS

E327. **Straight Eight.** Fruit uniform in size, slender, 8 in. long, dark green and smooth. Pkt., 10c; oz., 30c.

E324. **Improved Long Green** (70 da.). Makes delicious pickles when small. Crisp, of fine flavor. 9 in. long, dark green. Pkt., 10c; oz., 25c; ¼ lb., 85c.

E332. **Chicago Pickling** (58 da.). Special for pickles. Medium length, dark green color. Pkt., 10c; oz., 30c.

E320. **Davis Perfect** (50 da.). Grows about 10 in. long, slim, slightly pointed, dark green, with few seeds. Pkt., 10c; oz., 25c; ¼ lb., 85c.

E330. **New Everbearing.** A small early variety. Short, slightly pointed and of superior quality for pickles. Pkt., 10c; oz., 30c.

E328. **Early Cluster.** Hardy vines bearing clusters of two and three. Short, thick, dark green cucumbers. Pkt., 10c; oz., 30c.

## "Big 3" Cucumber Collection

E325. **"Straight 8," Improved Long Green, Chicago Pickling,** the three best for home garden. (Regular price 30c.) 25c, postpaid.

# SWEET CORN

I List Only the Very Best Varieties for the Middle West.

E292. **Sonderegger's Early Golden** (65 da.). After many years of selection I find this to be one of the best yellow varieties for this section. Stalks medium height, ears 7-9 in. long filled with sweet plump golden yellow kernels. Pkt., 7c; ½ lb., 18c; lb., 33c; 3 lbs., 90c; postpaid.

E305. **Golden Cross Hybrid.** Of all the yellow hybrids I like this one best. Every stalk produces one or two medium sized ears filled with large golden yellow luscious kernels. Pkt., 10c; ½ lb., 25c; lb., 45c; postpaid.

E296. **Sonderegger's Earliest** (60 da.). The earliest of all large eared white seeded varieties. Ears are filled with deep grained pearly white kernels. Pkt., 5c; ½ lb., 18c; lb., 30c.

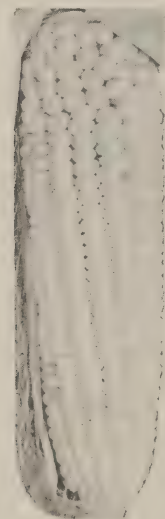

E304. **Sonderegger's Early Evergreen** (70 da.). This variety is very much like Stowell's Evergreen but 10 days earlier. Excellent quality, good canner. Pkt., 5c; ½ lb., 18c; lb., 30c; postpaid.

## "Big 3"

### Sweet Corn Collection

- ½ lb. Sonderegger's Early Evergreen
- ½ lb. Sonderegger's Early Golden
- ½ lb. Sonderegger's Earliest

Choicest Three for **22c** PAID POST

GOLDEN CROSS HYBRIDS

E308. **Stowell's Evergreen.** The standard main crop white sweet corn. Large ears, sweet and stay tender a long time. Especially fine for canning. Pkt., 5c; ½ lb., 18c; lb., 30c; postpaid.

E306. **Country Gentleman.** Very productive, kernels irregular, very deep, pure white and sweet. Ears 9 inches long. A very good variety. Pkt., 5c; ½ lb., 18c; 1 lb., 30c; 3 lbs., 80c; postpaid.

# POP CORN

E309. **Baby Jumbo.** An improved variety of Dynamite with the hulls practically eliminated. A good producer, is of excellent quality. Oz., 5c; lb., 35c; 3 lbs., 85c; postpaid.

E311. **Hybrid Japanese Hullless.** An extra heavy yielding variety. Hullless and of fine quality when popped. Pkt., 10c; ½ lb., 15c; lb., 40c; postpaid.

## Watermelon

E404. **Tom Watson.** Extra long, tough but thin rind. Deep red flesh. Pkt., 5c; oz., 12c; ¼ lb., 30c.

E408. **Kleckley Sweet** (85 da.). Oblong shaped, dark green. Flesh dark red, very sweet, solid and stringless. Pkt., 5c; oz., 12c; ¼ lb., 30c.

E409. **Early Kansas** (85 da.). Large size, dark green with lighter stripes. Flesh bright red. Delightful flavor. Pkt., 7c; oz., 15c; ¼ lb., 35c.

E410. **New Striped Klondike** (90 da.). An extra large variety, light green striped dark green. Good shipper. Flesh deep red, sweet and tender. Pkt., 10c; oz., 15c; ¼ lb., 30c.

E412. **Stone Mountain** (85 da.). Large, almost round. Flesh bright scarlet, sweet and crisp. Pkt., 5c; oz., 12c; ¼ lb., 30c.

## Pumpkin

E538. **Large Sweet Cheese** (110 da.). Large flattened fruit that keeps well. Flesh yellow, thick and very tender. Pkt., 5c; oz., 10c; ¼ lb., 20c.

E544. **Small Sugar.** The favorite pie pumpkin. Fruits medium size of deep orange color with thick sweet flesh. Pkt., 5c; oz., 10c; ¼ lb., 25c.

E610. **Cushaw.** Always large, mottled green and white, solid and heavy. Fine grained and sweet. Also called squash. Pkt., 5c; oz., 15c; ¼ lb., 30c.

## Squash

E603. **Sonderegger's Table Queen.** Finest baking squash, 8 in. long, thick, dark green, hard and smooth. Pkt., 5c; oz., 15c; ¼ lb., 35c.

E504. **Banana.** About 2 feet long, bears well. Of good quality and good keeper. Pkt., 8c; oz., 15c; ¼ lb., 35c.

E606. **Giant Summer Straightneck.** Heavily warted, neat lemon yellow, fine quality. Pkt., 5c; oz., 15c; ¼ lb., 30c.

E614. **Warty Hubbard.** Very dark green shell, hard and warty. Flesh tender and well flavored. Pkt., 5c; oz., 10c; ¼ lb., 25c.

## Celery

E272. **Sonderegger's Self Blanching.** Medium height, stocky and very compact. Foliage yellowish green. Stalks solid, broad and of delicate flavor. Pkt., 10c; ½ oz., 35c.

E274. **Golden Self Blanching.** Very early. Stalks solid, brittle and of delicious flavor. Pkt., 10c; ½ oz., 25c.

E282. **Sonderegger Best Celeriac.** Large white roots, smooth, of excellent quality and flavor. Pkt., 10c; oz., 40c.

# LETTUCE

E350. **Sonderegger Extra Early Head.** Heads are of medium size, solid, round. This lettuce is rich in flavor, buttery, crisp and tender. Pkt., 10c; oz., 25c.

E352. **Improved Hanson.** A very reliable sure heading variety. Leaves large, broad and crimped, of light green color and fine quality. Pkt., 7c; oz., 15c.

E354. **Sonderegger's Butterhead.** Best all around lettuce, extra good for forcing and summer use. Pkt., 10c; oz., 20c; ¼ lb., 60c.

E358. **Prizehead.** An early non-heading variety. The crumpled, crisp tender leaves are tinged brownish red. Pkt., 5c; oz., 15c.

E366. **Early Curled Simpson.** Leaves tender, sweet, of light green color, and excellent quality. A very early variety. Pkt., 5c; oz., 15c; ¼ lb., 45c.

E367. **Black Seeded Simpson.** Quick growing variety. Outer leaves light green, crisp, of fine texture and exceptionally fine flavor. Pkt., 5c; oz., 15c; ¼ lb., 40c.

## "Big 3"

### Lettuce Collection

1 packet of each:  
Early Curled Simpson  
Sonderegger's Extra Early Head  
Improved Hanson

All for **18c** POST PAID

## Endive

E286. **Green Curled.** Makes delicious fall and winter salads. Frost improves its flavor and quality. Pkt., 5c; oz., 25c.

E288. **Broad Leaved Batavia.** Large summer variety. Pkt., 5c; oz., 20c.

## Cantaloupes

E395. **Sonderegger Earliest** (82 da.). One of the best melons for the Middle West. Melons of medium size, with deep yellow very sweet flesh. Pkt., 10c; oz., 30c; ¼ lb., 60c.

E392. **Sugar Rock** (85 da.). Melons oval. Medium size. Flesh golden yellow and unusually sweet. Pkt., 7c; oz., 20c; ¼ lb., 60c.

E390. **Rockyford** (90 da.). Flesh greenish white, very juicy and sweet. Medium size, almost round. Pkt., 5c; oz., 20c; ¼ lb., 60c.

E380. **Bender's Surprise** (90 da.). Melons of large size, with flesh bright salmon and of finest quality. Pkt., 7c; oz., 20c; ¼ lb., 60c.

SONDEREGGER EARLIEST

# TOMATOES

- E624. Beebe's Early Prolific.** Medium to large globose shaped fruit. Flesh dark red, superb quality with very few seeds.
- E625. Albino or White Beauty.** The finest white tomato known. Flesh solid and without acid. Many people cannot eat red tomatoes on account of their acid content; they will find Albino just the right plant.
- E626. Pritchard or Scarlet Topper.** Extremely solid and heavy with thick walls of deep scarlet color. Very productive; one of the very best for home use or market.
- E628. Spark's Earliana.** Large, fine quality. Stoutly branched and very productive; fruit slightly flat, and red.
- E629. New Marglobe.** Second early on the market. Plants are vigorous growers and continue bearing until fall. Tomatoes large, round, smooth and of very dark color.
- E632. Rutgers.** Plant large with thick stems and vigorous foliage. Fruits globose, bright red, smooth with thick walls and small seed cells.
- E638. Ponderosa.** Very large fruit, solid, fleshy with small seed cells. Fruit a deep pink color.
- E640. New Stone.** Large fruit, scarlet in color. Smooth and ripening evenly and without any cracks. For main crop.
- E648. Yellow Pear.** Small yellow pear-shaped fruit which is used mostly for preserving.
- E652. Bison.** Very early, of medium size and very solid. A strong grower and heavy bearer, resists drought extra well.
- E654. The Ruby.** The strong, healthy vines produce an enormous crop of medium to large size rich red tomatoes. The globe-shaped fruits grow in clusters of 6 to 10. Very solid and meaty.

E1094. **Dwarf Mixed.** This mixture consists of the richest and most varied combination of colors. Pkt., 5c; Oz., 15c.

## PANSY

E1114. **The Viola.** Hardy perennial. Neat plant with small flowers which bloom profusely. E1107. **Swiss Giant.** Large flowers, perfectly round and many beautiful colors. Pkt., 10c.

E1106. **Masterpiece.** The petals are crimped and in such a fashion that the flowers appear double. The color variations are odd and striking, the rich dark shades predominating. Pkt., 10c.

E1130. **Mixed Colors.** An excellent mixture of colors. Pkt., 10c.

## PETUNIA

E1147. **Royal Purple.** Large flowers of a deep purple color. Pkt., 10c.

E1143. **Betsy Ross.** Dwarf bushy plants with red and white ruffled flowers with golden and deep red throats. Pkt., 10c.

E1142. **Rose of Heaven.** Dwarf bushy plants with very bright and showy dark pink flowers. Pkt., 10c.

E1151. **Flaming Velvet.** Large velvety blood-red flowers. Pkt., 10c.

E1150. **Fluffy Ruffles.** Large ruffled and frilled flowers in a well balanced mixture of colors. Pkt., 10c.

## PHLOX

E1166. **Choice Mixed.** Well branched plants with large flower heads composed of many round petaled florets. Pkt., 10c.

E1168. **Starred and Fringed.** Is very attractive with its fringed and pointed petals in a wide range of colors. Pkt., 10c.

## PORTULACA

E1200. **Single Mixed.** Brilliant colors, long lasting, frost. Like a hot, sunny place.

E1202. **Double Mixed.** Flowers are like little roses of many brilliant colors. Pkt., 10c.

## PYRETHRUM

E1222. **Single Mixed.** Large daisy-like flowers in white, pink and red; blooming in June. Easily grown from seed.

## POPPY

E1198. **Oriental.** Extra large flowers in most brilliant shades of red.

## SALPIGLOSSIS

E1230. **Large Flowering.** Petunia-shaped blooms with good veined petals of deep rich color.

## SALVIA

E1233. **Bonfire.** Erect spikes of brilliant scarlet on plants 14 inches high.

## SCABIOSA

E1236. **Double Mixed.** Their long stems and beautiful colored flowers make them very good for cutting.

## SWEET PEAS

E1316. **Spencer Hybrid Mixed.** Large flowering type and early blooming. Pkt., 5c; Oz., 15c.

## SWEET WILLIAM

E1320. **Double Mixed.** Hardy perennial. The broad clusters of fragrant flowers have fringed petals.

## VERBENA

E1323. **Spitfire.** Each plant bears 10 to 12 stems that are 15 inches long and can readily be used for bedding and cutting. Mammoth flowers of strong scarlet-rose color. Pkt., 10c.

E1324. **New Mammoth.** Fine for beds and borders. Many vividly colored flowers all summer and fall.

## ZINNIA

E1353. **Howard's Giant Crested.** Blossoms are 4 inches in diameter, with a round cushiony center, surrounded by broad guard petals. Magnificent shades of orange, yellow, rose and crimson. Pkt., 10c.

E1354. **Double Lilliput.** A fine mixture of the dwarf double zinnias.

E1352. **Giant Flowered Mixed.** A well balanced mixture of all colors which make a gorgeous showing.

E1360. **Giant Flowered, White.** E1362. **Giant Flowered, Crimson.**

E1364. **Giant Flowered, Bright Pink.**

E1366. **Giant Flowered, Violet.** E1368. **Giant Flowered, Yellow.** Above five varieties, 7c each, or 5 for 30c.

## CLIMBING VINES

E1416. **Mill-A-Minute Vine.** A rapid grower with fine foliage. Flowers creamy white with deep red centers.

E1407. **Cardinal Climber.** The leaves are deeply notched which with the cardinal red flowers give this vine a beautiful effect.

E1414. **Cypress Vine.** A beautiful annual climber with fern-like foliage and graceful star-shaped flowers.

## MORNING GLORY

E1432. **Pearly Gates.** Vigorous, fast climbing vines. Covered with lustrous white flowers from middle of summer until frost. Pkt., 10c.

E1433. **Heavenly Blue.** Rapid growing vine with large bright sky-blue flowers.

E1434. **Scarlett O'Hara.** Fast growing vine with dark green foliage and flowers of a dark wine-red color.

## ORNAMENTAL GOURDS

E1454. **Mixed Varieties.** This special mixture of the large and small ornamental varieties is very interesting. Pkt., 5c; Oz., 15c.

# VELVETY LAWNS from Sonderegger's Clean Seeds

## FANCY KENTUCKY BLUE GRASS

One pound of this seed will make a perfect stand on 200 square feet. Figure your seed on that basis. Spade the ground about 6 inches deep. Rake the ground. Now apply 3 to 4 pounds of Vigoro per 100 square feet. Rake again lightly. Wait from two days to a week before sowing. If there is no rain during that time sprinkle the soil. Sow, rake lightly, then roll to pack the ground. Apply a cover of fine cut straw, or better, of Peat Moss, soak the lawn down heavily. There is no substitute for this tested process. Per lb., 40c; 3 lbs., \$1.15; 5 lbs., \$1.80; postpaid.

## SONDEREGGER'S SPECIAL LAWN GRASS MIXTURE

Contains in the proper proportion the Fancy Kentucky Blue Grass and White Dutch Dwarf Clover, and a little Red Top, properly mixed so as to make a good even stand. Sow just like described under Fancy Kentucky Blue Grass, no difference in the care. Extra fine, choice seed, per lb., 48c; 3 lbs., \$1.32; 5 lbs., \$2.00; postpaid.

## WHITE DUTCH CLOVER

Lb., \$1.15, postpaid.

## VIGORO

The Best Fertilizer Ever Produced.

Use it freely not only in lawns, any place in your garden, on your trees, shrubs, even on your pot flowers. When you use Vigoro you are taking no chances. The leading gardeners are using it, landscapers find it the key to success. Vigoro builds up the soil, gives it what plant life requires, a balanced ration of plant food. It is economical to use, its price is in no comparison to the wonderful results it gives. This is why I say: Use more Vigoro. 12 oz. pkt., 20c; 5 lbs., 65c; postpaid. Not prepaid: 5 lbs., 50c; 10 lbs., 85c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00.

# SPRAYERS and SPRAYING MATERIAL

## CONTINUOUS HAND SPRAYER

This Sprayer is well built. Works easily and sprays a continuous steady mist. It handles any insecticides or household spray that does not contain sediment. Especially adapted for use with preparations which destroy ordinary metal containers. Fitted with mist nozzle which sprays a fine fog. Price, \$1.00, postpaid.

## ADMIRAL DUSTER

This new design Duster has been tried out and is a big improvement over the old type. It dusts all kinds of fine powders very evenly. It does the job with less material, less energy, and does it better. Size of dust container 4 inches in diameter and 4 1/2 inches long. Pump 14 inches long. Price, \$1.10; postpaid.

## CYCLONE SEEDER

This Seeder is nationally known; it is well built and will last for years. It is equipped with shaker bottom and a good adjustable feed so that it sows most all seeds very evenly. It also has a shut-off that can be closed and opened again without changing gauge. Lever which regulates the amount of seed per acre. Price, \$3.00, postpaid.

## SONDEREGGER'S ELASTIC PRUNING PAINT

Should be used wherever a limb is cut off or where the bark has been peeled off by rabbits. Prevents decay until the wound is healed. 1 pint, 60c; quart, \$1.00; postpaid. Not prepaid, gallon, \$2.50.

# Hotkaps

Hotkaps are made from an especially prepared paper which is water-proof, and when set over a small plant it acts as a small greenhouse by furnishing an extra amount of heat in the early spring when the weather is still cool.

25 Home Garden pkgs., postpaid...\$0.65  
100 Hot Caps Tamper and Setter, not prepaid...2.85  
250 Hot Caps Tamper and Setter, not prepaid...4.25  
1000 Hot Caps Tamper and Setter, not prepaid...11.00

## APHICIDE

This insecticide has been thoroughly tried out and I find it to be the best nicotine dust on the market. It contains a large per cent of nicotine, which makes it most effective against the striped cucumber bugs and the green aphids, which causes large losses all through the Middle West. This dust should be applied with a dust gun so as to get underneath the leaves where the bugs are usually found. Aphicide is made so that it will cling to the plants which makes it very effective against chewing or succulent insects. It is a poison, so cannot be sent by parcel post. Price: 1-lb. cans, 35c; 5-lb., \$1.40.

## HAMMOND'S SLUG SHOT

A non-poisonous insecticide. It is the safest, most effective, easiest to use and most economical general purpose insecticide made. Has given unusual satisfaction the world over for a half of a century. Can be used on cabbage, cauliflower, beans, etc., without fear of harm, as it does not contain poisonous ingredients. Lb., 32c; 5 lbs., \$1.30; postpaid. Not prepaid, lb., 25c; 5 lbs., \$1.00.

## LIQUID SLUG SHOT

This is a non-poisonous spray and is very effective on both chewing and sucking insects. There is no danger when using it on tomatoes, beans or other vegetables. I find it to be one of the best spray insecticides on the market. 1 oz. of Liquid Slug Shot makes 6 gallons of spray. 1 oz. bottle, 35c; 6 oz. bottle, \$1.10; postpaid.

## RENKEN SURE-CATCH GOPHER TRAP

Gophers are easily caught with this trap. Dig in the gopher mound, clean out the lateral tunnel, run a mound to main runway. Always set trap in lateral runway, do not over trap. Let light shine into the runway. First gopher that comes along will proceed to shut out the light and is caught. Never set trap in main runway. I have used these traps for years and have never found any better. Price, 80c; 2 for \$1.50; postpaid.

# FIELD SEEDS

As this catalog goes to press early in January, it is impossible to make prices on ALFALFA, CLOVER, GRASS, and other field seeds. We will have a complete stock of the very best field seeds as:

# Hardy PEAKS

## Prices, All Varieties

2-3 ft. ....	1	3	10
3-4 ft. nice straight trees, prepaid .....	\$0.38	1.00	3.00
4-6 ft. 3-year roots, 2-year crowns, selected specimens .....	.45	1.25	3.90
5-7 ft. special grade for quick bearing .....	.58	1.60	4.90
.....	.69	1.95	6.20

These pear trees are all well rooted, guaranteed true to name, strictly first class trees, hardy upland grown.

**Bosc Winter Pear** Finest quality late fall and winter pear; extra large, long tapering, russet. Keeps well. Tree vigorous, and profuse bearer. Hardy anywhere in Middle West and East. Plant more of this wonderful fruit.

**Flemish Beauty** Mid season. Large, pale yellow pear covered with russet, of fine quality, sweet and melting. Tree hardy anywhere in the Middle West, East and Northeast. Ripens in September.

**Duchess of Angouleme** The fruit is large, in quality as good as the best, for keeping, for table use, or for canning. For the Middle West and the East, Duchess should be in every orchard; very hardy, an abundant bearer, and a very fine pear. Ripens in October.

**Lincoln** Rapidly becoming popular, owing to its very good qualities. It is a large pear, yellow, flushed with bright red; fine for table use or canning. Hardy in Nebraska, anywhere in the corn belt, and the East. Your pear planting should include this tree.

**Kieffer** The popular late market pear, producer, that can be grown anywhere, even in the North where other pears would not be sufficiently hardy. For fresh eating the quality of Kieffer is not as good as that of the other sorts listed here, but for canning it is as good as any. For this purpose the pears are ground up and canned with lemon, orange, or quince for flavoring. You may try this method; I am sure you will like them, and find canning very simple.

**Seckel Pear** Also called Sugar Pear. Fruit is not very large, but is of finest flavor, as good as the best for table use, and for this purpose Seckel should be in every orchard. I do not recommend it for canning. Tree is a slow grower, but bears extra well, and is hardy. Can be grown wherever pears are known to succeed. Seckel ripens in September.

## DWARF PEARS

Of the pear varieties I am listing on this page, I can furnish Bartlett, Duchess of Angouleme, Seckel, in dwarf trees also. Of all other varieties I have the standard trees only.

There is no difference in the fruit, whether it is grown on the standard tree, which is a large tree, or a dwarf tree, which always stays in dwarf size and shape. The fruit is the same. Dwarf pears are preferred wherever the space is limited—in city gardens where they are grown along the lot line, or even as a screen. For this purpose they can be planted as close together as 10 or 12 feet in the row.

Dwarf pears bear quite young, commonly the second or third year after planting they produce a nice crop, and continue for many years. The trees are just as hardy as standard trees. Prices of Dwarf Pear Trees: 2½ to 4 ft. trees, 50c each; 3 for \$1.35; 10 for \$4.20; prepaid.

## PRICES OF CHERRY TREES

2-3 ft. healthy, well rooted trees, postpaid .....	1	3	10
3-4 ft. fine, branched trees, postpaid .....	\$0.45	1.25	3.75
4-6 ft. 3-year roots, 2-year tops, well branched, stem caliper ¾ inch .....	.55	1.55	4.60
Special grade, 1½ inch caliper, perfectly branched, choice trees. The best money can buy .....	.69	1.95	6.00
.....	.79	2.25	7.00

All my cherry trees are special grown for heavy production, with short stems for best and easiest picking, and even, well shaped crowns. These trees are sure to give you the results. You will be proud of your Sonderegger-quality cherry trees.

**English Morello** Large fruit, very dark red, nearly black; tender, juicy, rich in flavor, and ripens rather late, quite sour. Hardy up to the middle of Nebraska and Iowa. Tree is of spreading form.

**May Duke** Dark red, large fruited, juicy and rich; not very sour. Tree grows well, spreads low. A good bearer.

## Hardier Cherries

Sour Varieties  
Early Richmond  
See Color-Photo Next Page

Montmorency  
See Color-Photo Next Page

**Wragg** For the West and Northwest. Fruit medium to large, dark red, and of fine quality, almost like English Morello. Tree is very hardy, a good grower, and highly productive. For western Kansas, Colorado and western Nebraska, it is one of the best cherries. Ripens in July.

Hansen's  
New  
Bush Cherry

A greatly improved sand Cherry, bearing great quantities of fruit which is of fair quality for preserves. Very dark red, small pit. Makes an excellent hedge about 3 to 4 ft. high, perfectly hardy. Nice plants, well rooted 12 to 18 inch size, 3 for 50c; 10 for \$1.20; 25 for \$2.00. 18 to 24 inch size, 3 for 65c; 10 for \$1.50; 25 for \$3.00. Prepaid.

## SWEET CHERRIES

Not hardy in the northern states.

**Black Tartarian** A very large black color. This is a Heart Cherry, very sweet, of superb quality. The tree is a vigorous, upright grower, immense bearer. A popular market cherry. I recommend it for the South, the Pacific states, also the Great Lakes region and the New England states. In the Middle West they are not dependably hardy, although they are grown here and there in protected places with fairly good results. A great cherry in its proper place. Ripens fore part of July. Add 10c per tree.

**Yellow Glass** Fruit large, somewhat flattened in shape, of very beautiful golden color, firm, juicy, sweet and of fine quality. This is a Heart Cherry, and is therefore harder than Black Tartarian. It stood our dry summers and cold winters with fairly good results. I can recommend the tree for localities as far north as the southern half of Nebraska. Blooms late. Add 10c per tree.

## JUNE-BEARING

**Senator Dunlap** The famous strawberry. Quality, even size, productivity, vigorous growth of the plants, extreme hardness are the major points in favor of the old-fashioned Dunlap. My plants are young, well rooted; they will make you a No. 1 stand. 50 plants for 65c; 100 for 95c; 300 for \$2.50; 500 for \$3.80; prepaid.

**Fairfax** Claimed to be the sweetest of all June bearers. Ripens about a week ahead of Dunlap. Large bright red berries ripening perfectly to the core. For home use one of the choicest. 50 for 75c; 100 for \$1.10; 300 for \$2.60; prepaid.

**Sonderegger's Premier** The earliest of the June bearing sorts, a fine berry in every respect, and a good bearer. Should be in every planting for the first strawberries of the season. 50 for 75c; 100 for \$1.10; 300 for \$2.75; prepaid.

Order early, we ship to arrive at the proper time for planting in your locality. Strawberries are always packed and shipped separate; we do not ship them in one bale with trees or shrubs. This is to assure delivery of the plants in good shape.

# Strawberries

## HEAVY PRODUCING STRAIN

## EVERBEARING

Giant Gem Everbearer

Berries exceptionally sweet, glossy red and red-meat, large and firm. Exceptionally hardy and free from leaf diseases. Will make you a good crop in June and in the fall. 50 for 85c; 100 for \$1.60; prepaid.

**True Mastodon** The leading everbearer on the market. Has crowded all the older sorts off the market due to a larger berry and heavier production in June and late summer. A good home garden variety that will produce well for you with a little watering through the summer. 50 plants, \$1.00; 100 for \$1.85; prepaid.

**New Wayzata Everbearer**

A highly flavored, extra sweet strawberry producing extra well in the fall. Grows in a close, compact bush form, making runs and free sprouting. This is the latest introduction of strawberry novelties. I advise you to try this plant. 25 plants for \$1.10; 50 for \$2.00; prepaid.

TREES AND SEEDS THAT GROW

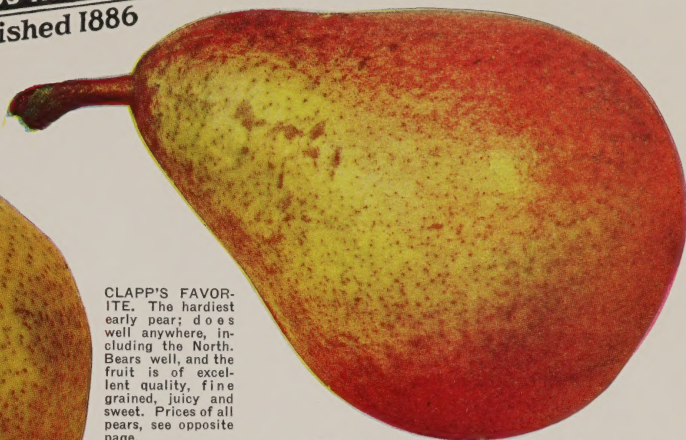

Established 1886

## Our Fruit and Ornamental Trees

And Plants are grown on upland, exposed to hot and dry summer seasons, and extremely cold winters. This accounts for the splendid results wherever they are planted.

**CLAPP'S FAVORITE.** The hardiest early pear; does well anywhere, including the North. Bears well, and the fruit is of excellent quality, fine grained, juicy and sweet. Prices of all pears, see opposite page.

**BARTLETT.** The finest early pear for fresh fruit and canning. Hardy anywhere in the East, the Cornbelt, and in the South. A grand producer.

**EARLY RICHMOND.** The most popular and undoubtedly the hardiest and best producing early Cherry. Fine canning variety.

**MASTODON.** Everbearing, produces good crops of large berries.

**LARGE MONTMORENCY.** Ripens 10 days after Early Richmond, and bears wonderful crops. Not quite as sour as other canning cherries, medium to large size, dark red. Prices of all Cherries, see opposite page.

**SENATOR DUNLAP.** The midseason strawberry famous for its quality, sure crop, and productiveness.

**Sonderegger**  
TREES AND SEEDS THAT GROW

**for Easy Starting  
... Early Fruiting  
... Quick Return ...**

**Our Grapes  
Never Fail!**

**CONCORD, BLACK.** The well known fine variety most popular for all purposes. Bunches and berries of good size, black, covered with a rich blue bloom. Skin tender but firm, juicy, sweet when fully ripe. Very hardy and productive; can be grown most anywhere. For the Middle West it is the best for home use, jelly, grape-juice or wine. Always dependable.

Prepaid .....	3	10	25	100
2-yr. nice plants..	\$0.30	\$0.70	\$1.50	\$5.00
2-yr. No. 1, extra choice .....	.40	1.00	2.20	7.80

**WORDEN, BLACK.** In popularity second only to Concord. Ripens about a week earlier. Berries a little larger, and for market purposes Worden will ripen more evenly. Fully hardy; needs no winter protection. 2 year No. 1 heavy plants: 25c each; 3 for 60c; 10 for \$1.70; 25 for \$3.65, prepaid.

**LUCILLE, RED.** (Note picture). Extremely hardy, even harder than Concord. The vine is a strong and healthy grower and is always sure to bear well. A sweet grape with excellent flavor. Plant Lucille for home use or market; it is early, and succeeds even in the North. 2-year extra nice No. 1 plants, 25c each; 3 for 60c; 10 for \$1.70; 25 for \$3.50, prepaid.

**NIAGARA, WHITE.** For home use and market, the most profitable white Grape, producing heavily, and the plant is as hardy as the Concord. The quality of the Niagara includes everything a fine grape should have: tender, sweet, with a pleasing aromatic flavor. Extra select, strong 2-year No. 1 plants: 20c each; 3 for 50c; 10 for \$1.40; 25 for \$2.90, prepaid.

**PORTLAND, WHITE.** A Splendid Table Grape. Our earliest White Grape. For quality, size of fruit and fine flavor it is unsurpassed. For your table use include a few Portland, Caco and Fredonia in your plantings; they will be the pride of your garden. 2-year No. 1 plants: 25c each; 3 for 65c; 10 for \$1.80; 25 for \$4.00, prepaid.

**CACO.** Light red to amber color when fully ripe, but the berries reach their full sweetness and flavor even two weeks before they color up, and are often used as white grapes. Extra large berries, very juicy, and highly flavored, an outstanding table Grape which should be in every garden. Special select for quick bearing. 2-year No. 1 plants: 30c each; 3 for 75c; 10 for \$2.00, prepaid.

**THOMPSON'S SEEDLESS GRAPE.**

Wherever the ground freezes this grape must be protected, or must be grown in a tub to be moved indoors. It is a Southern Grape, where it is a most profitable and abundant variety. 35c each; 3 for 90c; 10 for \$2.50, prepaid.

**FREDONIA.** Just like the picture above, and of unsurpassed quality. Just as hardy as Concord, and bears just as well. This is an early Grape, sweet, juicy, with a fine flavor. Plant Fredonia for table use. You will like this Grape. Extra select 2-year No. 1 plants: 25c each; 3 for 65c; 10 for \$1.85; 25 for \$4.20, prepaid.

**BETA, BLACK.** (Note picture below.) A handsome grape, small berries in compact clusters, very black, of excellent quality for grape juice, jelly or other purposes. This is the hardiest of all our grapes, and the most vigorous grower. Often used for arbors, to cover tree trunks, wind-mills or wherever a strong growing, hardy vine is needed. The grape of many uses, and a surprisingly heavy bearer. 2-year No. 1 selected plants: 25c each; 3 for 65c; 10 for \$1.85, prepaid.

**Seedless  
Concord**

LUCILLE

**Queen  
of Grapes**

**THE GRAPE THAT WAS TO COME  
SOME DAY!**

Resembling in size and flavor, also in ripening time and productiveness, the old fashioned well-liked Concord. Hardy in the East and Middle West. The first of a seedless race of Grapes which is hardy. While supply lasts, \$1.00 each, postpaid.

**GOLDEN MUSCAT.** A golden yellow, large, meaty grape, with very few seeds, borne in large clusters. Very sweet. The only hardy type of the famous Muscat Grape family. For home use or market, a wonderful grape. Ripens with Concord. Order early. Price for 2-year No. 1 plants: 50c each, postpaid.
